## **Time for Libraries to Shine**

Need some inspiration? Take a look at the Sparks! Ignition Grants we announced this week. These grants are an opportunity to explore an innovative idea and then report back about lessons learned. During the program's three-year run, we've seen that library and museum professionals are a creative bunch; they're taking risks and discovering new ways of thinking about operations and service.

Many of our 2011 grantees have posted white papers about their experiences, and if you'd like to take a peek at some great inventiveness, browse through these reports. Here's a taste:

- Learn how the New York Public Library worked with leading game designers to build an online tool to crowd-source transcription of its amazing collection of digitized menus – [View/Download \(PDF\)](#)
- Find out what the Museum of Science – Boston discovered about two strategies to implement universal design in drop-in programs [View Download \(PDF\)](#)
- Want to know more about what happened when the Brooklyn Public Library used a video screen with a live connection to one of the library's information services staff to greet new visitors? [View/Download \(PDF\)](#)
- Discover what happened when ECHO Lake Aquarium and Science Center in Burlington, VT created a museum-media partnership that combines the interpretive expertise of a science center, the mass public appeal of a television news channel, and the accessibility of a community-driven website to engage audiences to take environmental action in their local communities. [View/Download \(PDF\)](#)

**We're expecting more great insights from this year's winners. They are all exciting, but here are just a few to watch:**

- The Chabot Space and Science Center in Oakland California knows that firetrucks grab children's attention. Working together with local firefighters they will see what happens when they bring telescopes and computer equipment on shiny red fire engines to local neighborhoods.

- The Towson University Center for Geographic Information Systems will discover how integrating several datasets can create a map- and market-driven picture of library users and their preferences.
- The Friends of the North Carolina State Museum of Natural Sciences will see how they can adapt hotel software to provide detailed wayfinding maps for blind and visually impaired visitors.
- The Austin Public Library will partner with Goodwill Industries of Central Texas to learn more about engaging citizens and raising awareness about carbon-neutral reuse options for books and materials being weeded from library collections.
- The Center for Wooden Boats in Seattle will test using photogrammetry on “macro-artifacts” to monitor for changes overtime. Photogrammetry is the process of determining the geometric properties of objects from photographic images. This technique could be a good way to see if there is a conservation issue that needs to be addressed.

Let us know about innovations happening in your local library or museum. And share what you know so that we can continue to shine a spotlight on what works and lessons learned.  
 —Susan Hildreth, Director, IMLS

\*\*\*\*\*

**Washington, DC**—The Institute of Museum and Library Services (IMLS) announced today grants serving 242 federally-recognized tribes and Alaska Native villages and corporations and totaling \$1,672,000 for the **Native American Library Services Basic Grant** and Basic Grant with Education/Assessment Option Program.

"These small grants go a long way to help ensure libraries deliver core services for American Indian tribes and Alaska Native villages," said IMLS Director Susan Hildreth. "Libraries use the grants to buy library materials, fund salaries and training, provide Internet connectivity and computers, and much more to help meet the informational, educational, and cultural needs of tribal communities."

## **2nd Annual Global Crowdfunding Convention and Bootcamp – Oct 14-16**

Posted by [Dave Archer](#)

October 14, 2013    October 15, 2013    October 16, 2013

The 2nd Annual Global Crowdfunding Convention and Bootcamp is the world's most prestigious crowdfunding event with the largest gathering of industry leaders.

This new industry is projected to unleash 300 billion dollars in investment capital based on families and individuals investing 1 percent of their assets in crowdfunding – which will become a popular investment strategy for everyday people.

This is the must-attend event for entrepreneurs and small business owners, investors, crowdfunding professionals and enthusiasts, funding portals, investment bankers, financial advisers, VCs, angels, incubators, business coaches, mentors, secondary stock specialists, equity analysts, journalists as well as tax, legal and regulatory experts.

Here's a quick preview of key discussion points, workshops and game-changing EXPOs.

For Businesses Seeking Finance:

- Attend these sessions and workshops and save thousands in professional fees.
- Get prepared for the Crowdfund Investing Revolution! Get advice from the industry's leading attorneys, accountants, portals and marketers.
- Learn secrets and tips from social media experts.
- Save thousands in professional fees!
- Find the most appropriate financing structure for your business.
- Obtain the tools to successfully crowdfund before you spend money you will never recoup.
- Understand the differences between securities-based Crowdfunding, reward-based Crowdfunding & typical micro-cap investing.
- Get your company setup right before you pitch investors.
- Specific strategies for female entrepreneurs.
- How to simultaneously Crowdfund and work with the angel and VC community.
- Know the tax havens that will compel investors to your deal. Learn how the IRS will tax the capital received through the various forms of Crowdfunding.
- Attract investor attention and become crowdfund compliant! Learn how to create a fundable [business plan](#), proper due diligence reports and proforma financials via the Fundingroadmap.

- Learn how to properly value your company.
- Learn how to create a perfect crowdfunding investment pitch.
- Learn how to legally and successfully crowdfund in the current environment.
- Learn how to build a 30 day action plan for a successful raise using social media and other advances in communications to reach more investors & provide greater transparency.

For Investors and Financial Advisors:

- How to capitalize on the crowdfunding revolution. Discover the most lucrative ways of investing in this new market paradigm whether that be investing in emerging portals, service providers, infrastructure or specific crowdfunding offerings.
- Choosing investments and finding new hot industries/products based on successful crowdfunding campaigns.
- Learning the Crowdfunding Rules – What is legal? What is not?
- Private Secondary Share transacting and where to turn for private stock liquidity.
- Using self-directed IRAs to gain diversified exposure to the fastest growing private companies.
- Women’s integral role in shaping tomorrow’s financial markets.
- The settling & clearing of private shares.
- The Wall Street of Tomorrow – What role brokers, investment bankers and financial advisors will play.

Other exciting features you will only find at this event:

Funding Portal Pavilion™

Join us for two night’s of Las Vegas excitement and a cocktail party in the Funding Portal Pavilion™ and Expo where you will meet the largest gathering of crowdfunding websites, Funding Portals and the other cutting-edge companies that are building this cottage industry, providing small business support and ensuring your company’s success!

Crowdfunding Expo MarketPlace™

Crowdfunding Expo Showcase™

Crowdfunding pre-intensives for [Colleges](#) and [Universities](#)

Crowdfunding pre-intensives For Financial Advisers

Special workshops on reducing the Start up failure rate

and so much more.....

## **Jim "Agent of Assimilation" Prentice Mesmerizes AFN Participants**

Fool me once, Shame on You;  
Fool me twice, Shame on Me!

How many times do we Indigenous have to be had before we get it. Once again, our phoney Indian Agent Sellouts aka Band Council Chiefs are leading us down the final path of destruction.

We should run like hell from guys like Jim Prentice. He was in Whitehorse on Tuesday at the Assembly of First Nations AFN AGM where he gave another hypnotic speech this time to "Aboriginal" leaders. The AFN falsely claims it represents status Indians in Canada.

According to a March, 2013 article, Jim Prentice, 54, Senior Executive Vice President and Vice Chairman of the Canadian Imperial Bank of Commerce CIBC, "surprised the country six months ago when he quit at the height of his political career to become a senior banker at CIBC, said the transition has been relatively smooth so far, while proving that the skills and contacts acquired in politics can be golden in corporations."

How's that for an understatement?!?! The language daily becomes more blatant. Yet still only some people get it while others are nearly insane with cognitive dissonance they refuse to give up.

Prentice is in the media a lot, especially at Financial Post/Times where his voice carries much weight. He has a lot to say about the oil industry and Canada-U.S. relations, economic that is. It's all about the money for Jimmie. In a speech at the Canadian-government-sponsored "Financial Times Forum: Focus on Canada" in New York, he states, "Continental flows of hydrocarbons responding to market realities are relentless and more oil is now being moved across North America on rail cars, avoiding pipeline bottlenecks..." That's just what Bill Gates and Warren Buffett want to hear.

Let's look critically at his NYC speech to business and gov leaders along with the Whitehorse one to AFN leadership on Tuesday, July 16.

Working class Canadians are getting the hose, how much more we Indigenous who have always been at the bottom of the colonial socio-economic ladder. As some of our people scramble for a belated share of the loot, the Anglo elitists are desperately making deals with the Chinese elitists. Let us be clear Anglos refers to the exclusive blood lines/owners of the British Empire in its many manifestations like Commonwealth and social experiments like Canada, USA, Australia, New Zealand and South Africa. Our focus is on Canada and USA as these are impositions on Turtle Island, our ancestral territories where Indigenous ties to the Earth continue to be severed via the brutality

of the modern capitalist economic system and its political effigies. But we digress...

Prentice gives direction to his listeners, "The Prime Minister and the President could use the Clean Energy Dialogue as the vehicle for this discussion as it allows for the resolution of emerging energy and environmental irritants." Yes, we know Jimmie finds any concern for Mother Earth to be an "irritant", even a deterrent to his relentless avarice.

Trilateral Commission member and deputy chairman, Jim reveals his NAU North American Union globalist intentions when he says, " we can together pursue a full-on harmonization of the transportation grid and bring continental standards to the rail and aviation industries."

He emphasize his points by repetition, "Canada and the United States need to return to those very principles of free trade that are enshrined in NAFTA, and we need to address energy matters on a continental basis".

In a sweeping gesture, he sums it all up, " Canada and the United States share common objectives, a common resource base and airsheds and watersheds that transcend boundaries."

"I like being Minister of Indian Affairs. But I'd much prefer to be Minister of Aboriginal Inc."

Jimmie Prentice, MP from Calgary and modern day TreatyMan/Ripoff Artist claims to fame include "the Sturgeon Lake Treaty Land Entitlement settlement in 1986; in 2006, the Residential School Agreement; with the Tsawwassen First Nation and Premier Gordon Campbell, the first Lower Mainland Final Agreement under the British Columbia treaty process and GwaiiHanas Marine Conservation Area agreement with the Haida in 2009."

You can see where he has been wreaking havoc among Western Indigenous nations in what is called Alberta and B.C.

Jim "Agent of Assimilation" Prentice gave quite a speech at the AFN AGM Annual General Meeting. He knows the importance of keeping Indigenous mesmerized to the Canadian dream. Jimmie got to the point, "The real issue now is whether B.C.'s First Nations are going to participate in all of this (LNG to Asia) in a meaningful way, or simply observe it as bystanders."

He's always ready to walk all over us, his ears tightly shut and his eye on the loot.

He waxed eloquent as his forked tongue slithered across his lips,  
"Today, thanks to our abundance of natural resources, we stand on the

We abuse land because we regard it as a commodity belonging to us. When we see land as a community to which we belong, we may begin to use it with love and respect.

Aldo Leopold

verge of a new era of growth and development. It is national in nature. It is substantial in scope. And in many cases it represents a game-changing opportunity for First Nations."

He knows damn well we are a threat to his demented schemes.

"...We are talking about hundreds of billions of dollars in major resource developments that are currently – or will be – taking place on or near Aboriginal

communities."

How much you wanna bet he has no intention of us getting a share, not this time, not ever??

And he goes on to name some of the plunder projects, even going so far as to state, "Quebec's massive northern resource development plan was created with – and will benefit – the Cree, Innu, Naskapi and Inuit" and "One of the unheralded benefits of the Canadian oil sands has been the extent to which the Aboriginal people of northern Alberta have been included – and have benefited."

Is he joking? No, but he is taking us for fools. He talks about the importance of education for "aboriginal youth" to be fully assimilated, "It is also important that we find opportunity in our country's skills shortage, and help equip young Aboriginals with the expertise they'll need to get ahead."

Get ahead!?! Does he really imagine we're going to get on the tread mill with all the other wage slaves??

He refers to the Matawa First Nations (who have retained Bob Rae to guide their Ring of Fire negotiations) signing "a memo of understanding with Aecon Group to expand training and development

programs in remote areas of Ontario's north – using technology to give residents access to trades and apprenticeship training."

Bob Rae was once NDP Premier of Ontario. He is a master at sleight of hand, most recently as Leader of the Liberal Party and the Opposition.

Construction giant, Aecon is the parent company to Lockerbie and Hole, the same outfit that is building the private prison Remand Centre in Edmonton which will house over 2,000 people, about 1/2 being Indigenous. Some of the top dogs at Aecon are J. D. Hole and Tony Franceschini, (retired President and CEO, Stantec Inc., Chairman of the Board of ZCL Composites Inc. and director of Seattle-based Esterline Technologies Corporation), both of Edmonton. Brian Tobin, Canadian politrickster former premier of Newfoundland and Labrador, Executive Chairman of Consolidated Thompson Iron Mines Limited and vice chair at BMO is also on board at Aecon. Like Prentice, he was once Minister of Industry and is now a big wheel at a big bank. Toronto-Dominion Bank hired Bilderberger Frank McKenna, former New Brunswick premier, former Canadian ambassador to the U.S. and former member of the Supervisory Commission Canadian Security Intelligence Service CSIS, as a deputy chairman in May 2006. Frank is a board member at CNRL, a big producer in the oil sands.

These guys have all the bases covered. This is how Canadian politricksters are rewarded and always have been rewarded. You know you're living in an oligarchy when...

Like Indian Treaty Commissioners, Alexander Morris and Duncan Campbell Scott before him, Prentice is brutally clear but who's listening when it really matters. "Aboriginal leaders" prefer to be molly coddled. They refuse to hear that there is no room for the Indigenous way of Life. There is no room for us to say "No!" to development projects:

"The duty to consult and accommodate was created as a way to get to 'Yes,' not as a way to get to 'No.' It was created by judges to ensure that First Nations had a seat at the table in decisions involving resource development. It was created to assist First Nations in extracting meaningful economic participation from those decisions. It was meant to carry us forward. It was not meant to serve as a mechanism to block projects, veto development..."

..."Once you sit down, the objective is to achieve sustainable economic participation. Consultation must progress to negotiation, and negotiation must maintain a meaningful direction and a positive momentum."

Prentice is clear. It's his way or the highway. Once again the AFN and wealthy house niggers like Atleo are selling us down the river.

Opposition to their actions is confused but coalescing into a desperate struggle even as we write these few lines.      Kittoh

#### Notes and Sources

This is an outrageous Government/Media collaboration of the most sinister form of propaganda.

FT Global Investment Series: Focus on Canada  
New York, United States      March 13, 2013      10 on the Park

In the latest series of high-level forums, the Government of Canada, in partnership with the Financial Times, brought together over 100 business and government leaders to discuss the latest trends and factors relevant to considering Canada as a place to invest in the energy and technology sectors.

The Honourable Jim Prentice, Senior Executive Vice President and Vice Chairman at CIBC, and senior executives from Siemens Canada, Mistras, Cenovus Energy and Praxair Canada spoke about the North American energy sector, covering topics such as infrastructure, technology, and innovation, and also discussed the importance of their Canadian operations. Corporate executives from Arkadium, Avanade, Cellfish, and Deloitte also gave strong testimonials on the advantages of doing business in Canada, while John Lutz, President of IBM Canada, provided an overview of the company's presence in Canada, highlighting recent investments that IBM has made in various regions of the country.

#### Speakers at the event included:

Harbir Chhina, Executive Vice-President, Oil Sands, Cenovus Energy  
Ed Crooks, US Industry and Energy Editor, Financial Times  
The Honourable Ed Fast, Minister of International Trade and  
Minister for the Asia-Pacific Gateway, Government of Canada  
John Lutz, President, IBM Canada Ltd  
Daniel Pink, Best-selling author and journalist  
The Honourable Jim Prentice, P.C., Q.C., Senior Executive Vice  
President and Vice Chairman, CIBC  
Kenny Rosenblatt, Co-founder and CEO, Arkadium  
Fabrice Sergent, Founder and CEO, Cellfish  
Bill Smith, Senior Vice President, Energy Sector, Siemens Canada  
Sotirios Vahaviolos, Chairman, President and Chief Executive  
Officer, Mistras Group, Inc.  
Aziz Virani, President, North America, Avanade  
Matthew White, President, Praxair Canada
