"If" you are in doubt as to the claimed "ownership" of all Lands across the world, by title and domination (by Vatican, and the Nations that follow them and their Gregorian calendar), just look up "doctrine of discovery" and lay your doubts to rest... to everyone else who already knows about this... We are the new revolution/ renaissance ~ May all beings be liberated from suffering... so the World can at last be at peace... Bye bye hierarchical domination, your time is up!" ~ From another Everyman

HIGH-POWERED ATTORNEY MAY ASSIST CATTLE RANCHER IN BLM DISPUTE

Flanked by someone who could be their famous new lawyer, members of the embattled Bundy family plan to unveil possible legal action today in connection with the failed federal roundup of their cattle.

[Want to See Where Your Taxes Go?](#)

Robin Claremont, OtherWords: The National Priorities Project has done the work for you. Using a customized tax receipt calculator, you can find out exactly how the federal government spent each penny of your 2013 taxes. [Read the Article](#)

[Myron Dewey](#)

Today was a successful day with the **Paiute Nation Youth "Nuumu Productions team"**. The youth culturally introduced themselves, honored the elders and presented a giveaway to the community of items they themselves made all week (drums, earrings, medallions, Indian tea and pictures from their photography shoots).

Opening my council members Monte Bengochea and Kris Kris Hohag

I was so proud of the youth representing their tribe and family with good teachings.

The youth shared 15 short films, trailers, interviews and digital story telling short films with the crowd clapping and enjoying everyone they watched.

I see future the tribal leaders in the bishop Paiute Nation tribal youth, thank you to the OV CDC Staff, tribal council ad community r all your hard-work and participation.

Getting some much need rest,

Many Blessings to all our relations in the 4-directions

From: 7 Landmarks to Visit Before Climate Change Ruins Them

Joshua Tree National Park

The clock is ticking on just how long California's Joshua Tree National Park will be home to its namesake yucca. A 2011 study published in the journal *Ecological Applications* used climate models to forecast that the desert tree could see its historical range dramatically reduced by 2100. "The established ones may persist for 150 years," said Ken Cole, an ecologist with the U.S. Geological Survey and the paper's lead author. "But within 90 percent of its current range, they will be unable to survive," he added. The reason for the die-off is straightforward: Neither the Joshua Tree nor the yucca moth can survive without each other. "The moth's larvae depend on the seeds of the yucca plant for food, and the yucca plant can only be pollinated by the yucca moth," reports [Nature Conservancy](#). And, because climate change will make it too hot for the

moth to survive in the desert southwest of the twenty-second century, the pollinator will be forced to migrate north to find a cooler home.

I would like to announce the **2014 UNLV Summer Transportation Institute** which will be held on **July 14-28, 2014** in Las Vegas, Nevada. The institute represents the first of many UNLV STEM education initiatives specific to the Southern Nevada region. To address low rates of STEM field participation at UNLV a priority has been placed to seek and identify applicants from Nevada Tribal communities. The University of Nevada, Las Vegas is currently an accredited Minority Serving Institution (MSI) seeking to create more opportunity for underrepresented minority students and first generation college students.

Please see program information below

UNLV will host the 2014 Summer Transportation Institute (STI) Program for high school participants from **July 14, 2014 – July 28, 2014**. This will be a residential program where the participants will reside on the UNLV campus and participate in transportation related activities. The purpose of the STI Program is to create awareness and stimulate interest in high school students to take full advantage of the opportunities that exist in the transportation industry exclusive to Southern Nevada.

The STI Program is sponsored by the U.S. Department of Transportation, & The Federal Highway Administration, and is open to participants attending public and private high schools across the State of Nevada.

The following criteria will be utilized to identify candidates for the institute
Participants must:

- **Be in the 10th or 11th grade for the 2014-2015 school year.**
- **Have completed or be qualified to enroll in Algebra for the 2014-2015 school year.**
- **Have cumulative grade point average of 3.0 on a 4.0 scale (minimum).**
- **Have an interest in engineering, science, transportation, or technology-related careers.**

- Provide two letters of recommendation.
 - *One letter must be from a qualified teacher commenting on the participant's behavior. The letters of recommendation must be on letterhead and from individuals who know you from school, work, or an organization. The letters cannot be from friends or relatives.*
- Provide standardized test score(s) and a copy of school transcripts.
- Provide an essay explaining why you want to participate in the program. Describe your career objective(s), and explain how this program can assist you in meeting your individual career goals.
 - *Your essay must be typed and not exceed one (1) page with 1-inch margins, single-spaced, and 12-point font.*
- Attach a list of your awards, achievements, and organization memberships.
-

The selection team will also consider the geographical location of applicants to ensure representation from all regions of the State. Please consult with your science, mathematics and technology education teachers for the names of potential participants who may qualify for the STI program.

Attached is the flyer and application package for the Institute. If you have any questions please ask me

Build Your Business with a Great Web Presence

On the fence about a website for your small business? Here are 3 resources that will not only convince you that every small business should have a great website, but guide you in exactly how to make that a reality – as painlessly and effectively as possible.

[> Read more](#)

TIP: Providing career training and job opportunities to returning service members is an

important part of honoring our veterans for their service. BusinessUSA has a [veterans resources tool](#) that allows vets to quickly and easily find federal programs that can help get their businesses started or expand their existing businesses.

With my continuing fascination of how things come back to traditional ways:

5 Incredibly Nutritious Snacks Made of Bugs

Food companies try to worm their way into your tummy with new products made with insects.

<http://www.takepart.com/photos/edible-insects/exo>

Tiny Farms

While these other companies are the public brands, [Tiny Farms](#) is a “collaborative project” that wants to fuel the movement behind the scenes. Tiny Farms is a foundation funding start-up insect businesses, but it’s more than that: It’s a think tank for entomophagy, partnering with academic and thought leaders to produce cutting-edge research on how bugs can help feed the world. One of its latest projects is a kit—[Open Bug Farm](#)—that allows people to grow edible insects at home.

HotLix

What started out as an oddball novelty a quarter-century ago may be gaining culinary relevance as a leading insect snack company. [HotLix](#) became known for its handmade candies with whole insects baked right into them (imagine licking a translucent green lollipop and finding a scorpion in the center), but it has added a line of salty snacks such as fried crickets (available in three flavors), crunchy larvae, and chocolate-dipped insects.

DIY World Change: 14 Kids You Should Know About and Their Incredible Projects

They're back **State agency website taken down by hackers**
By Dennis Myers dennism@newsreview.com
This article was published on 04.24.14.

While the hacked website was being redesigned, an apology was posted.

The Nevada State Library and Archives website came back online last week, several weeks after it was hacked and shut down.

The hackers installed their own material on the site, which was quickly detected by the enterprise IT services arm of the Nevada Department of Administration, which informed Library and Archives officials. The site was taken off line and, after some discussion, it was decided to fully redesign what was a relatively aged website.

No public announcement of the hacking was made. When the RN&R asked Library and Archives administrator Daphne DeLeon, she confirmed it.

“That’s correct,” she said. “It was hacked. Enterprise informed us right away, as soon as they detected the hack. ... “They brought [the website] down. My staff looked at the site and found there material that was not put up by us. ... We went ahead and made the decision to use staff resources to redesign it. Our website wasn’t available for two months.”

During those months, some regular users of the website said they were able to continue using it through Google caches. But for inquiries from less computer-savvy customers, library staffers fell back on pre-computer age methods of serving them.

“We had to send material out a different way and spent more time doing that,” DeLeon said.

This is the home page of the new website of the Nevada State Library and Archives.

She said that added to the cost of the hacking, but that it was not generally an expensive episode. The redesign had already been talked about before the hacking, she said. It was accelerated, but the money would have been expended at some point.

She was not able to say when the redesign would have happened if the hacking had not occurred.

“That’s difficult to surmise,” she said. “We have been in the planning stages. We are the last division in the Department of Administration to migrate.”

While the site was shut down, an apology was posted: “The Nevada State Library and Archives website is down. Please contact the agency directly at (775) 684-3313 for assistance. We apologize for the inconvenience this has caused you. We are working to make the Nevada State Library and Archives website available as soon as possible.”

The site address has been changed from <http://nsla.nevadaculture.org/> to www.nsla.nv.gov, likely a reflection of the fact that the state's Cultural Affairs Department was split in two in the latest state government reorganization, with some functions attached to Tourism and Library and Archives attached to Administration. The now defunct Cultural Affairs was created by a previous reorganization. Consolidating the functions was described as saving money in the reorganization that created Cultural Affairs. Splitting them up was described as saving money in the latest reorganization.

The new design is more colorful than the relatively staid previous design. DeLeon said the

changes on the site mostly make things easier rather than providing new capabilities. "They were dictated by how the website organically grew before," she said. More and more things were regularly tacked onto the older site, with routes created that now have been shortened.

"Not necessarily," she said when asked if the website can now do things it couldn't do before. "It is better in terms of what they couldn't get access to. We tried to make things a little easier to find, within two or three clicks. ... In terms of new information, I don't think we put up anything new."

When the website went back online, administrator of the State Archives and Records Management program Jeff Kintop sent email messages out to regular aficionados of the site: "The myths of the month [written by Kintop's predecessor, Guy Louis

Rocha], always a popular resource, are up in a new format. There are quick links to key projects and programs on the front page. There is a Nevada Literary Map link off the resources on the front page. And NSLA has a YouTube channel and a Nevada Reads Facebook page."

It's not known what, if anything, is being done to track the hackers. Enterprise IT information officer David Gustafson could not be reached for comment.

Members booted from Rolling Hills tribe for not meeting ancestral criteria

A little more than 100 members showed up for the meeting (April 12th), but nearly half, including one tribal leader, were asked to leave by Tribal Chair Andy Freeman.
