UNR student Melissa Perez Rios, 21, plans to own a gym and restaurant in the future. The Ozmen Center for Entrepreneurship at the University of Nevada, Reno, is launching its Women's Initiative. Reno Public Radio's Natalie Van Hoozer has more.

0:36/1:18

Listen to this story.

A group recently gathered at the Innevation Center in downtown Reno to mark the start of the new project. It aims to connect local business owners with aspiring student entrepreneurs and build mentoring relationships.

“Really the biggest goal is to encourage not only young women on campus but women in the community to engage with the entrepreneurial process,” said Kylie Rowe, the Assistant Director of the Ozmen Center.

She said a driving factor for the effort was the Sontag Entrepreneurship Competition this spring. Several teams competed for \$50,000 to grow their startups, but one thing stood out: none of the finalists were women.

“We were so shocked by that actually because when you look at this amazing community of women, there are so many women that are engaged in entrepreneurship,” Rowe said. “We just felt like that was not reflective of the real community.”

Business students like 21-year-old Melissa Perez Rios agree: “The entrepreneurial landscape is just dominated by men, so it’s nice to have something in the university supporting women creating new businesses.”

The Ozmen Center plans to hold similar events in the future as well as build the center’s academic course offerings at UNR.

BIG FOOT MESSAGE Shared by Standing Elk

BIGFOOT Cultivates Purity,
Innocence and Truth

Sasquatchitan. I am Chief of
Sasquatchi People. You may
think we are hairy and have
big feet. Really this is not so.

I come to speak to you
because soon, our people
will come to you again. The
reason we had to leave the
community of human beings is because of their loss of this innocence, truth, and purity. For our
race and the Laws of our race are based upon these three.

All true Star Nations practice innocence, truth and purity.

Our people did not want to leave the human beings. This is why you have seen us here and there.
Your grandfathers and grandmothers who have grown through what you call “years” usually are
those who have seen us, because the Earth Walk teaches innocence, truth, and purity. This is why
the Elders are the Spiritual leaders.

Our people are ready to come to the human beings again, to live with you and to teach you many
things.

First, human beings must purify. For when we see you, we see things that are very horrifying to
us because we have spiritual sight. You must cleanse the cloud of bad spirits that surrounds you,
the negativity, unholy feelings, and unwise thoughts. Not only do these dark clouds prevent our
people from having relationship to you, it prevents you from having relationship with Spirit and
having relationship with Mother Earth.

We will share some practices now that will help you.

First, within the Sacred Elements, Earth, Water, Fire, and Air, there is the power for your
cleansing.

If you were to bury yourself in Earth and stay there for a day, you would be clean.

If you were to go and stay with Brother Waterfall for a day, you would be clean.

If you would stay under the Desert Sun for a day, you would be clean.

If you would stand in the Strong Winds of the Mountain People for one day, you would be clean.

The Elemental Peoples love human beings. They will do service at any time for you. Take Tobacco to them. Pray for their Nation and they will come to you with hearts overflowing.

Then, honor their gift to you by changing the way you think, feeling with true heart, praying for renewal with Creator and honoring Mother Earth with each footstep.

The way of cleansing for human beings is right outside your door.

Mother Earth and her peoples are glorious beings of Universe!

Learn to respect us!

You look to the skies for miracles, the miracles are here!

Open your eyes and see!

Mother Earth is a great teacher of Innocence. She is a great teacher of Truth. She is Purity embodied. Know your Mother! Most of you came from far away to be with her and to be with the Peoples of her Love.

We Sasquatchi are ready to join you in the community of Sacred Law, in True Heart. We will teach you how to step through those Portals of Time. We will teach you how to remember who you are, your starry intelligence and wisdom. We will help you learn how to be in balance with the Sacred World around you.

Our Peoples have adopted this Universal Law and its sign as the symbol of Our coming and as the energy of our Teachings. And so, you may call us through these ways.

First, we will check you out. We will watch you. We will see if you are ready.

Can you see the little signs? For the biggest teachings are little things. We will be watching to see. For, when you can respect that little pebble, you can respect us. You can respect who you are.

Purity. Go out to the Sacred Waters.

Innocence. Remember when you were very young and be that way.

Truth. Stop trying so hard to lie.

The Elemental Brothers and Sisters are of these Essences. They are Purity in form. They are single. They are True. They are unpolluted, they understand that they are the Keepers of Life.

Learn from Soil and Stone.

Learn from River and Ocean.

Learn from Fire and Lightning.

Learn from Wind and Bre

They are so close to you that you cannot remember who they are. And yet, not one action that you take, could you do without them.

These Sacred Element Peoples will restore you.

And then we, Sasquatchi, will come and teach you the community ways of being in balance with Sacred Mother. Then your lifeline will be unbroken as ours has been from the beginning.

Water Study Shows Mines Lower River Flows

June 3, 2016 - Suzanne Potter, Public News Service (NV)

[Play Audio in Browser Window](#)

A new study finds the lake in the pit of the former Lone Tree Mine near Battle Mountain is leaching water from the nearby Humboldt River, reducing flow. (Tom Myers)

RENO, Nev. - Mining is shortchanging other water uses in drought-stricken Nevada -- even after a mine shuts down, according to [a new report](#).

When the Lone Tree Mine near Battle Mountain stopped operating in 2007, the study found, the nearby Humboldt River lost 180,000 acre-feet of flow.

Report author and hydrogeologist Tom Myers said mining below the water table means pumping out the local aquifer to keep the mine dry, and dumping the excess water into the nearest river. But when the mine closes, he said, the river naturally replenishes the aquifer, reducing the river flow for farmers, ranchers and others who depend on that water.

"The implications are that if you have a water right on that river, you're less likely to get it," he said. "You're less likely to have water to put on your fields, and there's less water going into the Rye Patch Reservoir."

Myers said the river water loss is 7 percent to 8 percent. There are still six working mines near the Humboldt River, and dozens more around the state.

The Progressive Leadership Alliance of Nevada commissioned the study. Conservation groups have said they want mining companies to be more efficient in their water use, and think more regulation may be necessary. Ellen Moore, a mining specialist with PLAN, said legislators should take this study's findings into account when planning for the future.

"This became a topic that lots of people are talking about because of the drought," she said.

"That's something that we feel like we're not getting the full story on from the mining companies,

and something that needs more research, more attention."

According to the U.S. Drought Monitor at the University of Nebraska, Nevada is the driest state in the nation and is now in its fifth year of drought.

The report is online at planevada.org.

Latest King Tut Discovery Makes Everyone Believe In The Illuminati

Real-life archaeologists who are way cooler than Indiana Jones have discovered that the Egyptian Pharaoh Tutankhamun's dagger is actually [made from meteorite metal](#). Using X-ray fluorescence, researchers at Polytechnic University of Milan analyzed the dagger shrouded in mystery. It was thought that this kind of iron melding did not exist until the 8th century BCE, but King Tut's dagger was sealed in the tomb with him in the 14th century BCE. Even cooler: ancient Egyptians knew this iron came from a meteorite before we did. Early Egyptian writings referred to it as "iron of the sky." Needless to say, minds are blown and everyone regrets not pursuing archaeology as a career.

Scientists Announce HGP-Write, Project to Synthesize the Human Genome

By ANDREW POLLACK

The formal announcement of the plans, which leaked last month, seeks to raise \$100 million this year. The total price tag could exceed \$1 billion.

“All servants imported and brought into the Country...who were not Christians in their native Country...shall be accounted and be slaves. All Negro, mulatto and Indian slaves within this dominion...shall be held to be real estate. If any slave resist his master...correcting such slave, and shall happen to be killed in such correction...the master shall be free of all punishment...as if such accident never happened.” example of slave codes, early South.

WHO ARE THE THREE SISTERS

The crops of corn, beans, and squash are known as the Three Sisters. For centuries these three crops have been the center of agricultural and culinary traditions for many Native Americans . It is for good reason as these three crops complement each other in the garden as well as nutritionally.

HOW TO GROW A THREE SISTERS GARDEN

Article by Melissa Kruse-Peebles, NS/S Education Coordinator

For many Native American communities, three seeds - corn, beans, and squash represent the most important crops. When planted together, the Three Sisters, work to help one another thrive

Myron Dewey · Schurz, NV ·

I am humbled to be asked to speak to the future leaders of our of the Agui-Dicutta (trout-eaters) recent graduate.

Opened up with a song to honor our graduates and let them know they are the hope, the future leaders of our community and tribe.

With a Pesho Shoe-know-me (good thinking or good mind) you will be able to accomplish anything. Next was our language and culture, the importance to know who we are as Paiute people, learn from our elders and about our tribe.

There was so much more I wanted to share, but overall I spoke from the heartthe youth are the future leaders and hope of our people....

Let's all help them get their with a good heart, teachings and good mind..

Many thanks to our education program, [Candice Birchum](#) and all who helped, our tribe.
