Why Is There A Virtual Media Blackout On Standing Rock?

The mainstream media is missing quite a remarkable story.

www.huffingtonpost.com

The Federal Corp of Engineers set up a message line to accept comments on Standing Rock. Call 202-761-8700 to leave your message. Given the personal accounts of abuse I've been hearing, the government needs to hear from the American people about their view of Standing Rock and the proposed pipeline.

Terra Nullius and the History of Broken Treaties at Standing Rock

Kiana Herold, IC Magazine: If treaties are the supreme law of the land, as the US Constitution states, then how is it that treaties can be so easily broken by a government that claims to uphold a respect for the law? An even more unsettling question: How is it that the trail of broken treaties has been able to span generations under an outdated, imperial logic? [Read the Article](#)

Freezing protesters soaked with water in pipeline protest

Authorities described the clash as a 'riot'; protesters accused authorities of using water cannon in below-freezing temperatures. nbcnews.comlBy [NBC News](#)

[Laura Fillmore](#) [NBC News](#)

E'sha's footage, and imbedded in the article are 10 of Stephanie Keith's photographs of the struggle Sunday evening. She's freelancing for Reuters and has been in camp since before November. Mad respect for the media--took 24 hours to hit national news cycle, but it did hit. Keith is one of the people who took the photograph of Helen and Hale in the water on 11.1.16. Onward. Helen and Herman will be there today. Heart.

The Stream: Dakota Access Update

The Army Corps completed its initial review of the pipeline's Missouri River crossing and determined that more review is necessary. The corps says it is [talking with the Standing Rock Sioux](#) about whether an easement for the pipeline to cross federal land could be granted and also protect water sources from pollution.

The corps did not respond to Circle of Blue's questions about the legal nature of these "reviews", whether they are being conducted under the National Environmental Policy Act or whether they are a negotiation with the Standing Rock Sioux.

The Global Rundown

The largest bank in **Norway** sold off its assets in companies involved with the Dakota Access oil pipeline, citing concerns about protests over water quality and sacred cultural sites. Meanwhile, dozens of investment companies called on four of the **world's** biggest meat producers to address water pollution risks associated with their businesses.

\$3 million Amount of the investments Norway's largest bank, DNB, held in companies involved in building the Dakota Access oil pipeline. The bank announced last week that it was [selling those holdings in light of protests against the pipeline](#), many of which center on concerns about water quality. *The Local*

"Broad mismanagement of local water resources can lead to devastating regulatory, reputational, and litigation risks, weakening a company's ability to operate profitably." --Kristel Verhoef, active ownership specialist at the Netherlands-based fund and asset management company ACTIAM. A coalition of 45 institutional investors representing \$1 trillion in assets [sent letters today](#) asking major meat producers — including Cargill, Inc., JBS, Perdue Farms, and Smithfield Foods — to address water pollution concerns. (*Ceres*)

Communities upstream of gold mining activities in Peru's Madre de Dios region may have some of the [highest levels of mercury contamination](#), according to an unpublished map based on the preliminary findings of researchers at the Duke Global Health Institute. Mercury used to extract gold has long poisoned fish in the region's rivers, and the studies and map seek to give officials a better idea of where people are most affected by the pollution. *Guardian*

[Jeremy Scahill: TigerSwan Security, Linked to Blackwater, Now Coordinates Intel for Dakota Access](#)

Juan González, Democracy Now!: Jeremy Scahill has spent years reporting on private security contractors such as the security firm TigerSwan, which has links to the now-defunct mercenary firm Blackwater and is in charge of coordinating intelligence for the Dakota Access pipeline company. He discusses the company's sinister track record. [Watch the Video and Read the Transcript](#)

protesters in
freezing weather**

As temperatures dropped into the 20s, law enforcement in North Dakota sprayed protesters with water cannons, tear gas.
washingtonpost.com

“There is no excuse for military tactics being used on behalf of a private corporation that’s benefiting from government lands, against peaceful protesters who believe the pipeline could harm cultural sites and drinking water for the Standing Rock Sioux tribe.”

Robert Reich

NYT EDITORIAL

**Power
Imbalance at the
Pipeline Protest**

By THE EDITORIAL BOARD

President Obama could step in to protect everyone's safety and pressure the sheriff's officers to stand down in North Dakota.

"Hey Daddy, what did you do at work today?"

"Well son, I beat the shit out of the original Americans cuz they had the nerve to try and protect their water"

Tribal Water Rights Settlement

The House Natural Resources Committee also [passed a bill that approves a water rights settlement with the Blackfeet Tribe of Montana](#). The Obama administration is in favor of the deal, and the Senate approved it in September.

The settlement affirms the tribe's rights to 750,000 acre-feet of water from six drainage basins and nearly all the groundwater beneath the reservation. It includes at least 65,000 acre-feet of water per year from three federal canals or reservoirs. It also authorizes \$US 422 million in federal funds for to repair, maintain, or construct the facilities that will deliver the water to the reservation.

Final Review of Stream Protection Rule

An Interior Department agency published the final environmental review of [a rule for protecting streams from coal mining and coal waste](#). The Office of Surface Mining's stream protection rule strengthens requirements for pre-mining data collection and monitoring of streams and groundwater during operations but it would weaken other areas. It prohibits mining through streams or through land within 100 feet of streams unless regulators approve an exception. Dumping mine waste into this buffer zone, however, is not allowed.

Green groups were hoping for a stronger buffer zone rule and are advocating for provisions in the final rule for citizen lawsuits as a means of keeping pressure on state and federal regulators. "The devil will be in the details," Neil Gormley, lead attorney for Earthjustice, told Circle of Blue. "That's why we're waiting to see the final rule."

Mountaintop removal projects are still permitted as long as they do not damage waterways and the land is reforested.

The Office of Surface Mining considered, but did not adopt, a rule that would have prohibited all mining and waste disposal within 100 feet of a stream. The office found that these prohibitions — which would strand 86 percent of surface coal reserves — were "so substantial that they ran counter to the mandate...to balance the need for energy with the protection of the environment."

EPA Advisory Committee Discusses Lead and Copper Rule

On December 6 and 7, the National Drinking Water Advisory Council will hold a public meeting in Washington, D.C. The council, which advises the EPA on drinking water policy, [will discuss recommendations for revising the Lead and Copper Rule](#). A teleconference option is available.

Thanks to the Flint scandal, the revision is in the spotlight. On October 26, the EPA published [a summary of the options it is considering](#). The right course of action is, in fact, disputed ground. Even within the advisory council [there are dissenting views](#) about what the EPA should do and how strong the regulations should be.

The EPA expects a draft rule in 2017.

THE INDIAN CAMPAIGN.; THE PART TAKEN BY GEN. CROOK'S COMMAND. THE UNAUTHENTIC INFORMATION HERE TO FORE PUBLISHED--THE MEETING BETWEEN GENS. CROOK AND TERRY--INADEQUATE SUPPLIES AND LACK OF TRANSPORTATION FACILITIES--THE SICK LIST--THE INDIANS UNABLE TO STAND A CONTINUOUS CAMPAIGN.

From Our Own Correspondent. (); October 11, 1876, , Section , Page 4, Column , words

[DISPLAYING ABSTRACT]

NEAR CUSTER CITY, Monday, Sept. 25, 1876, While Gen. Crook's command awaits orders here from its chief, absent a Fort Laramie, the occasion seems favorable for a few words on the incidents of the Summer's campaign so far as concerns the part taken in it by Gen. Crook. Of Gen.... Terry's movements we know little or nothing, except for the short time the two columns were together. When they separated on the Powder River...

Some Nevada Data Bases of Interest

[Nevada Business Entity Search](#)

Includes Trademarks, Trade Names, Service Marks, Reserved Names & Business Licenses

Provider: Nevada Secretary of State

Access: Free on web

[Nevada Contractor License Search](#)

The Nevada State Contractors Board is committed to promoting public confidence and trust in the competence and integrity of licensees and to protect the health, safety and welfare of the public. This site allows the ability to search for licensed contractors and disciplinary actions against contractors.

Provider: Nevada State Contractors Board

Access: Free on web

Nevada State Library, Archives and Public Records Digital Collections

Provides access to Nevada's culture, heritage and history, showcased in two major collections:

- Historical Nevada Collections - Digital copies of original manuscripts, photos and records
- Historical State Publications - Digital copies of publications produced by Nevada government agencies

Provider: Nevada State Library, Archives and Public Records

Access: Free on web

Nevada Job Connect

Nevada JobConnect oversees and provides workforce development services to employers and job seekers of Nevada. For employers, Nevada JobConnect offers recruiting, retention, training and retraining, and outplacement services, as well as valuable information on labor law and labor market statistics. For job seekers, Nevada JobConnect offers career development information, job search resources, training programs, and, as appropriate, unemployment benefits.

Provider: Governor's Workforce Investment Board

Access: Free on web

Nevada Legislators, 1861 - Current

This database contains biographies on Nevada Legislators.

Provider: Nevada Legislature

Access: Free on web

Nevada Revised Statutes (NRS)

Full text database of Nevada laws.

Nevada State Jobs

The State of Nevada is an equal opportunity/affirmative action employer. Qualified persons are considered for employment without regard to race, sex, sexual orientation, gender identity or expression, religion, color, national origin, age, genetic information or disability, as outlined in the State Affirmative Action Plan.

The State of Nevada publishes several different types of recruitment announcements (i.e., unclassified and classified). You are strongly encouraged to view each occupational group listed on the left to ensure you are aware of all the employment opportunities available to you.

Provider: Division of Human Resource Management

Access: Free on web

Nevada Water Rights Database

Water Rights Section of NDWR is responsible for reviewing and approving water rights applications, for new appropriations and for changes to existing water rights, as well as evaluating and responding to protests of applications, approving subdivision dedications for water quantity, evaluating domestic well credits and relinquishments, issuing certificates for permitted water rights, conducting field investigations, and processing requests for extensions of time for filing proofs of completion and proofs of beneficial use.

Provider: State of Nevada Division of Water Resources

Access: Free on Web

Nevada Workforce Informer

Nevada's premier source of workforce and economic information and analysis.

Provider: Nevada Department of Employment, Training and Rehabilitation

Access: Free on Web

ERIC

ERIC, the Education Resource Information Center, provides access to education literature and resources. The database contains more than 1.3 million records and provides access to information from journals included in the Current Index of Journals in Education and Resources in Education Index.

Provider: EBSCO

Access: Free on web

Federal Digital System

GPO's Federal Digital System (FDsys) provides free online access to official publications from all three branches of the Federal Government. Through FDsys, you are able to:

Search for documents and publications — FDsys provides advanced search capabilities and the ability to refine and narrow your search for quick access to the information you need.

Browse for documents and publications — FDsys offers browsing by collection, Congressional committee, date, and Government author.

Access metadata about documents and publications — FDsys provides information about Government publications in standard XML formats.

Download documents and publications in multiple renditions or file formats — With FDsys, users can download a single file or download content and metadata packaged together in a compressed file.

Provider: Government Printing Office

Access: Free on web

Foundation Center's Funding Information Center

Foundation Directory Online provides access to timely, comprehensive information on grant makers and their grants. This database includes over 100,000 foundations, corporate giving programs and grant making public charities in the U.S.

Provider: Foundation Center

Access: In Library use only

General Land Office Records

Provides live access to Federal land conveyance records for the Public Land States, including image access to more than five million Federal land title records issued between 1820 and the present. We also have images related to survey plats and field notes, dating back to 1810. Due to organization of documents in the GLO collection, this site does not currently contain every Federal title record issued for the Public Land States.

Provider: Bureau of Land Management

Access: Free on web

GeoCommunicator

GeoCommunicator is the Bureau of Land Management's publication site for the distribution of geospatial data and products to the public. GeoCommunicator provides free interactive

mapping, map streaming services (ArcIMS (image and feature), WMS, ArcGIS (REST, SOAP, KML), web data services for online products or user developed products including GeoCoder (converting latitude and longitude -> land description and vice versa), Find LD (pass a land description and have the spatial description returned), Derive LD (pass the spatial component and have the land description returned, and Survey Exporter (pass the township have the coordinates returned).

Provider: Bureau of Land Management

Access: Free on web

[Grants.gov](#)

Provides information on over 1,000 grant programs and vets grant applications for 26 federal grant-making agencies.

Provider: US Dept. of Health and Human Services

Access: Free on web
