From the Eagle Watch October 14, 2016

There is so much going on everywhere!

These are some of the FB posts over the past few days. Outside FB there
isn't much in the news about this ongoing and very serious standoff at
Standing Rock Lakota territory (North Dakota). There is quite a bit of
"bad press" trying to make the Protectors look like "rioters".

Tribal Chairman Dave Archambault wants to move the Oceti Sakowin Camp onto
tribal lands. Not everyone agrees. They will decide on Sunday.

Sacheen Seitcham

October 12th 2016, OFFICIAL STATEMENT

We stand with Mark Tilsen and his call out for people experienced in civil disobedience and non-violent direct action to come to Standing Rock for a Month of Mayhem. Time is short, the Black Snake is unfurling at a fast rate. For example, this morning two semi-trucks were deployed with police escorts to site 119, where the 20 mile injunction zone was recently lifted.

The trucks were filled with barricades to stop any of the Water Protectors, and indeed some of the People from the encampment deployed a caravan to the sites. There was heavy police presence at every turn off, and there were many people who were turned back from heading to the site. At this time it is unclear what became of that attempted action.

What we require is any and all People to come and participate in whatever way they can to stop DAPL, especially if you have experience in Civil Disobedience or Non Violent Direct Actions, although don't let inexperience stop you, the training is available. The call out by Mark Tilsen can be seen here:

<https://www.facebook.com/mtilsen/posts/10154420489991047>

Everyone needs clean water. We call on all those who live downstream to come up here and make a stand to stop the pipeline in its tracks. The planes and helicopters that are invading our space daily, along with the constant police presence is not only wasting the tax payer's money, it is an invasion of our Human Rights. When the Government uses domestic terrorism against the People, these actions are in direct violation of UNDRIP and there was no Free Prior and Informed Consent of the People. Building the pipelines is not only violating our people it is violating our Mother Earth.

The very veins of Mother Earth are being violated and poisoned forever. We are in a fight to save our very existence as human beings, and to ensure continuity of life for the next seven generations. This is not a game nor a protest; we are fighting in a war for life on Planet Earth. All resource extraction must stop NOW for life to continue in a good way. If we don't fight, the future is not only bleak, we face mass extinction.

It is our inherent right and responsibility as Indigenous People from Turtle Island to stand up and fight back. This is a call out to all people who drink water. Clean water is a human right. It is your fight too, without water we will all perish. The time is now! The pipeline as of now

is over 90% completed, they are working to push through as fast as possible and we must amp up our resistance. The Morton County Sheriff's Dept are not working for citizens, they are working for DAPL. The power of the people is in our numbers and we need to grow our resistance, your presence is required.

Sacred Water Needs Water Warriors NOW.
Sacheen Seitcham·

PIGS LIES! they all lie! there was no tire irons, bats, or wasp spray! heinous that they would outright lie, there was drums, singing, and strong hearts protecting Sacred Water! Our people have shined, they report they stood in line and were confronted with baseball bats and tire irons and being sprayed with wasp spray, he said. Our deputies said there was a need for law enforcement. #PigsForPipelines #FTP #FuckThePolice #FuckThePipelines #NODAPL #ACAB that's why Indigenous Media ESSENTIAL in this fight for clean water that 17 million people rely on!

Here's the article referenced:

http://host.madison.com/news/local/dane-county-sheriff-pulls-deputies-back-from-north-dakota-pipeline/article_9739055c-70e9-55ce-969d-4a76acf5be89.html

Jon Eagle Sr.

To our friends and relatives who work on Standing Rock and live in Bismarck, we are getting word that Highway 6 is closed due to DAPL protest and 1806 may be closing. The schools are letting out at noon so that children and families can get home before the highways close. Be safe and have no fear in your hearts.

URGENT UPDATE: October 9th 2016

Only three days after the Morton County Sheriff's department staged a press conference that stated they were calling in reinforcements and escalating actions against the Water Protectors, the Comanche Nation led a prayer walk from Oceti Sakowin, Standing Rock Encampment. They left the encampment, and walked on Highway 1806 towards the sacred burial grounds where the dog attack occurred and that has been desecrated by construction of the DAPL pipeline.

Shortly after they started the walk, they were confronted by 12 police vehicles including four State Police and eight Sheriff's. The situation here is so extreme, that our people cannot even walk down a highway without being assaulted. The fact that we cannot even walk in prayer without harassment is a testament to the times we live in and how much value is put on oil and profit before water and people.

Women, children, and elders were amongst the Prayer Walkers, they had flags and other ceremonial items with them, they were unarmed and the intention of the police was to intimidate and harass them as they offered songs and medicine to the Sacred Water. This is an act of war against our people and our very way of life.

People were very upset and in a high state of emotion to have their ceremony disrupted in such a manner, we are lucky that Camp Security responded so quickly and they came to protect those praying, they arrived to form a line with coordinated action ensured the safety of the people and actively diffused the police who left when they seen the support of 200 people come to defend and protect the people in prayer.

We are very lucky no one got hurt and shortly after the police left roughly over 150 people came together to pray in a circle and to ensure they did not come back. The level of the tactics the police state is uncalled for, they are using escalating force as they waste taxpayer's money on deploying helicopters and police every day. This is a battlefield in the fight for clean water we will hold our frontline and protect Mni Wiconi with strong hearts.

What the world needs to know is that the atmosphere of fear and aggression is not coming from the Indigenous peoples of the lands, it is coming from DAPL and the police state, it is coming from the Governor protecting his shares in the pipeline.

The very presence of the Comanche Nation today peacefully walking in ceremony as Water Protectors has threatened DAPL. We will remain strong, and we will hold the frontline in our fight to Protect the Sacred. We call

on all who say we will be there when it gets real. It is real and the time is now, we are calling on all Warriors to come here and lend your body to our battle for clean water. WATER IS LIFE

Members of our extended family were attacked, hit and run over by a truck during a peaceful #IndigenousPeoplesDay march in Reno, NV yesterday.

As you can see in the footage the truck drove into the crowd while revving its engine before plowing through our people.

We send prayers and strength to the courageous warriors who stood their ground!

Mike Allen I live in Reno and heard about this attack shortly after it happened. From the local news reports, 5 people received minor injuries and one woman was taken to the hospital with non-life threatening injuries. I also understand that the driver surrendered himself to police a few blocks away. I have not heard what if any charges have been filed yet.

First Daughter and the Black Snake with Winona LaDuke.

Tioga, North Dakota is where the oil starts it's journey down the pipeline. The riders decided to pay a call on Enbridge to count coup on Indigenous Peoples Day. Seems that most workers were off for the day celebrating Columbus Day. more videos: <https://www.youtube.com/watch?v=LBftN8fgxDU>

US Army Corp of Engineers refuses to authorize further construction of Dakota Access Pipeline

The US Army Corps of Engineers is refusing to authorize the resumption of

the construction of the \$3.8 billion Dakota Access Pipeline. Further to that, the Corps reiterated its request to the company to [A]voluntarily stop work[A] on private land in the area. RT America[A]s Manila Chan has the story.

There are many more videos up on FB. Look for Winona LaDuke and Red Warrior Camp.

This is a little something extra to make your day.

Shannon Chief shared Derek Nepinak's post.

I like this hunting story.. it illustrates a mindful and respectful hunt for the moose..

"Left to right; Niibin Makwa (Derek Nepinak) camp Chief, George L., expert scout, Jeff K., expert scout, Damien Bear, Jr. Hunter, Jeremy McKay, Jr. Hunter, Tazz McKay, Jr. Hunter, John Napew Jr., expert guide. All party are members of the Anishinaabeg nation."

Derek Nepinak's photo.

"A cow moose in striking distance. We left it alone. We won't take cow moose."

"Some of you may know what Im cutting...!!"

"Being congratulated by one of our community Elders for cutting a nice backstrap.."

+3

Derek Nepinak added 7 new photos.

The Duck Mountain traditional hunt 2016 will never be forgotten. We honoured the moose spirit over the weekend by ensuring that the teachings

and protocols of a respectful hunt were followed and we took only one of the young bull moose that presented itself to us over the weekend.

The Duck Mountain currently has no open season for moose hunting because the herd is in a delicate and recovering state. After walking many miles around the trails, it is clear to me that the herd is a young and fragile group. The numbers are good, but they are not strong numbers and any

future hunting on the mountain has to be carefully monitored so that the herd remains strong for our future generations.

I know the Anishinaabeg from our communities around the hills are great hunters and could take a moose anytime. I have hunted with great hunters over the years and have learned a tremendous amount about how we hunt and why we are good at it. This great skill of our people needs to be carefully utilized to build the confidence and the skill of another

generation of great hunters. I feel that the moose is part of our community as Anishinaabeg people and we must always create space for the comfort of the Moose in the mountains close to our homes. We cannot survive as Anishinaabeg people any other way.

In order to gain access to the mountain without interruption, confusion or misunderstanding, myself and a group of young people met with the province to talk about the state of the Duck Mountain Moose herd and spoke of our intention to harvest a bull moose. There was no objection from the province as they too want to know how a traditional hunt is done and how to better understand the great skills of the Anishinaabeg hunters from our territories. They also want to know how we are going to be able to preserve the herd for another generation. I told them that they must stop hunting for sport if they want to build a good relationship with us.

With human understandings in place, we met with our Elder teacher and sundance leader Wally Swain, who told us stories about the hunt and what our responsibilities would be. We passed tobacco. That evening I had a dream that we were hosting a feast and that we were feeding elders. I knew from that dream that we would have a successful hunt.

(Bucky Harjo pic)

As we approached the mountain at dusk to set up camp, we were excited to see what would happen. No sooner did we enter the Duck Mountain and a large bull moose came out onto the road right in front of us. It stood there and watched us and with only about 75 yards of distance and the broadside of the bull, we decided not to take it. It was too early for us in the hunt to take the bull and leave. Rather, we chased it into the bush so that we could continue to our camp area to start the fire and have a

light dinner.

The next morning we were up at 600am and out on the land by 715. Within a couple of kilometres to our hunting area, I spotted a cow moose across the clearing standing broadside. We stopped and had a good look at the cow moose as it stood and looked at us. It would have been an easy kill but we also know not to kill cow moose because they are either nursing a calf, or are preparing to be bred for a future generation of moose. We left the cow alone and continued our hunt. We saw many signs of bull moose on the move and we missed the crossing of a large bull by moments. As the day passed, we split into two groups and began following up on sightings of moose from one of our scouts who is an expert of the moose hunt and offered to help us.

While following tracks later in the afternoon, we startled a bear that had been burrowed in the side of a hill. It ran right beside me and took off fast. It ran right towards one of our scouts and then ran right by him, missing him by about a foot or two before getting lost in the bushes. It was a tense moment but I never felt anyone was at risk.

Later in the day we began to call near dusk. Towards sunset, a bull moose came out of the brush and one of our young hunters took him down. After hauling the young bull back to the camp for skinning, we retired for the night after a long day on the mountain. The following morning, we took the moose home to Pine Creek where the women recieved teachings from local women from Pine Creek with skills in cutting and preparing moose meat. I myself, cut the backstrap out for the group and kept a small piece of the tenderloin as well!!

This hunt will be remembered for the lives of those who participated and we will build on this experience to ensure that other young people from our community also learn the ways of the Anishinaabeg. Many Meegwetches to John, Georgie, Jeff and others who helped out throughout the weekend. Oscar Delgado - MY STATEMENT ON MONDAY'S INCIDENT:

Of my four years of being a councilman, Monday's incident under the Arch has been one of the most heart aching ordeals to process. It is still shocking to me that a protest turned violent in our community. As we look for resolve, I appreciate everyone that called me and spoke at City Council on Wednesday. I appreciate the Reno Police Department for examining the evidence and moving forward with arrests for those responsible for the violence. Violence is never the answer. I believe that whenever a person's First Amendment rights are obstructed by violence, it is our responsibility to thoroughly evaluate the motives and incident from the initial encounter of all those involved, to its conclusion. That responsibility now lies in the hands of our elected City Attorney Karl Hall. I believe this case has enough merit for City Attorney Hall to forward the investigation to the District Attorney's office for further consideration.

Everyone of us has ideals that are protected by our constitutional right of free speech. What happened last Monday was an obstruction of that right and we should all take issue with it because it threatens our way of life. We all have the right to celebrate our beliefs and it's understandable that those ideals are different from person to person. But violence should never be the reaction. We need to remember that diversity is what makes our community great and we must always choose humanity over hate.

~~~~~  
***Hate crime victim Kitty Colbert: “He drove by [Reno City Plaza] more than once, shouting racial slurs and then he drove to the arch,” Colbert told The Post. “He had driven around the block so he could be facing us in oncoming traffic.”***

Colbert said Mahaffey then drove his white pickup truck within inches of the crowd, telling the protesters he was about to run them over.

“He said, ‘I’m going to drive right through here and kill you motherf—kers,’” Colbert said. “The sound of his voice sounded like he meant it, so I was in the process of getting out of the way.”

Mt. Hope Case Tests Mining's Right to Water over Other Users

Join us October 17th, 12:00 to 12:30 PM at the PLAN offices – 203 South Arlington, Reno.

The event will bring public attention to the need for equitable water policy that does not favor the mining industry over other water users. The mining industry is the second largest pumper of groundwater in Nevada.

Support our work to Protect Nevada's water.

The lawsuit, filed by Great Basin Resource Watch and the Western Shoshone Defense Project, challenges the Bureau of Land Management's approval of the massive Mt. Hope molybdenum mine near Eureka, Nevada, which is expected to pump up to 10 million gallons of water daily for up to 43 years. The proposed mine is highly controversial and has received widespread opposition from local families, conservationists, and Native Americans.

Donald Trump's long history of clashes with Native Americans

'I think I may have more Indian blood than a lot of the so-called Indians,' he once said.
