FOCUS: Police Clash With Pipeline Protesters

<http://readersupportednews.org/opinion2/277-75/39979-focus-police-clash-with-pipeline-protesters>

Bad Crazyiness at Standing Rock

Militarized police confronted and began forcibly removing Native and Indigenous activists and their allies, known as the Water Protectors, who were peacefully demonstrating against the

Dakota Access Pipeline on the ancestral homelands of the Standing Rock Sioux. Private and local security have increasingly

resorted to aggressive tactics such as dogs, pepper spray, low-flying helicopters, and roadblocks to intimidate and invoke fear.

[Stand with the Water Protectors by calling on President Obama to investigate and address rights violations associated with the Dakota Access Pipeline and to reject the pipeline once and for all.](#)

The sacred land at the center of the Dakota pipeline dispute CNN

Corporate greed and potential environmental disaster are arguments against the Dakota Access Pipeline. But a big issue for the Standing Rock Sioux is the threat to sacred land. [Read the full story](#)

A North Dakota pipeline leak justifies Standing Rock Sioux's protest against DAPL Blasting News UK

Last weekend, a pipeline in North Dakota owned by a Houston-based company, Oasis Petroleum, ruptured. Currently, nearly 70,000 gallons of crude oil has leaked out from this pipeline into the White Earth River, a stream that flows into the Missouri River and also the same river that the Standing Rock Sioux are trying to protect by protesting against the Dakota Access Pipeline. Recap of the Dakota Access Pipeline On October 10, Indigenous People's Day, a series of well-known protests began after [Read the full story](#)

EPA releases the EJ 2020 Action Agenda

Today EPA released the [EJ 2020 Action Agenda!](#) This is the culmination of almost two years of public engagement, hard work, and planning and we are very proud to share the final version of the strategy. This reflects a large step forward for EPA, as we continue to advance environmental justice within EPA and throughout the country.

Find out more by reading this [blog post](#) from Administrator McCarthy talking about the importance of EJ 2020, as well as our [press release](#), and a [factsheet](#) as well. We also have this [video, The Promise of EJ 2020](#), in which EJ stakeholders weigh in on what it will take to put this strategic plan into action.

Please share on social media and through your networks to generate momentum and excitement around EJ 2020 so we can keep things moving forward, bring more people into the conversation on environmental justice, and start the process of making progress towards the ambitious goals laid out in the strategy.

EPA chief says her agency “has a lot to prove” on environmental justice.

Access & Awareness Webinar Series from the Federal Interagency Working Group on Environmental Justice

"Working Together: Lessons Learned from Collaboration for Community Revitalization"

Thursday November 10, 2016 at 1:00pm – 2:30pm Eastern

[Register Today](#)

Established by Executive Order 12898, the Federal Interagency Working Group on Environmental Justice (EJ IWG) comprises 17 federal agencies and White House Offices that work together to guide, support and enhance environmental justice and community-based activities. Check out the EJ IWG Webpage (<https://www.epa.gov/environmentaljustice/federal-interagency-working-group-environmental-justice-ej-iwg>) for more information.

The EJ IWG is launching the Access & Awareness Series, a monthly event, to provide public access to the working group and to increase community awareness of federal agency environmental justice strategies and holistic community-based solutions to address environmental justice issues. This series will help the public gain a deeper understanding of how federal agencies are collaborating and what resources are available to anyone interested in improving the health, quality-of-life, and economic opportunities in overburdened communities.

Webinar No. 4 - Working Together: Lessons Learned from Collaboration for Community Revitalization

- **Date:** 11/10/2016
- **Time:** 1:00pm – 2:30pm Eastern

Description

This webinar will focus on sharing strategies to address the challenges of interagency collaboration for community revitalization. Viewers will gain a better understanding of collaboration mechanisms that bring together various stakeholders including community-based organizations, federal, state, and local agencies. Presenters will discuss the EJ IWG's Framework for Collaboration, the strategy that guides environmental justice collaboration between the 17 federal agencies, and the work of the North Birmingham Interagency Working Group in facilitating place-based collaboration and strategies for revitalization through regulation, community engagement, and brownfield end-use planning.

Lastly, Representatives from the City of Birmingham, Alabama and the Community Coalition of North Birmingham will share their experiences, including challenges,

opportunities and lessons learned, and how the audience can utilize interagency collaboration for community revitalization. They will discuss how interagency efforts have supported revitalization in their city and supported the establishment of the North Birmingham Community Coalition (NBCC) revitalization plan, a brownfields inventory and task force, Brownfields community training, and a winning EPA Brownfields assessment grant proposal.

Upcoming EJ IWG Webinars

Title: Improving Wastewater Infrastructure in Vulnerable Communities

- **Date:** 12/8/2016 from 1:00-2:30pm EST
- **Purpose:** Highlighting challenges and solutions to providing wastewater infrastructure in some of the most vulnerable communities in America.
- [Register Here](#)

Title: Discrimination Protections and Promising Practices in Federally Assisted Emergency Management

- **Date:** 1/12/2017 from 1:00–2:30pm EST
- **Purpose:** Discussing new guidelines and resources to protect against discrimination and promote the inclusion of all vulnerable communities in federally assisted emergency management and related activities.
- [Register Here](#)

If you have any questions, please contact [Jeanine Finley](#) for additional information.

Subscribe to the [EPA's Environmental Justice Listserv](#) to receive registration information for upcoming webinars and activities!

Community Conference Call on EPA's Proposed Rulemaking

November 3, 2016

2:00 - 3:30pm EST

Conference Line: 1-800-309-5450 / Conference Code: 12189544

Purpose: To provide information on upcoming activities in EPA's Air Programs and foster a dialogue with communities on their air quality issues. This call will provide updates on:

2015 Ozone National Ambient Air Quality Standards (NAAQS) Implementation Rule

- This rule will propose necessary updates to the existing ozone NAAQS implementation rules to address the strengthened 2015 ozone NAAQS, which were issued on October 1, 2015.
- It will propose nonattainment area classification thresholds, and address implementation requirements including the timing of attainment dates for each classification and a range of implementation plan requirements for non-

attainment areas and states in the ozone transport region under the 2015 ozone NAAQS.

- **Speaker:** Robert Lingard, EPA's Office of Air Quality Planning and Standards

The Kigali Amendment to the Montreal Protocol to Phasedown Hydrofluorocarbons (HFCs)

- The Montreal Protocol on Substances that Deplete the Ozone Layer held its annual Meeting of the Parties in Kigali, Rwanda, from October 10-14, 2016 where the Kigali Amendment to phasedown the production and consumption of hydrofluorocarbons (HFCs) was adopted.
- For more information, please visit: <https://www.epa.gov/ozone-layer-protection/international-actions-montreal-protocol-substances-deplete-ozone-layer>
- **Speaker:** Nancy Akerman, EPA's Office of Atmospheric Programs

Two Recent Rules Addressing Hydrofluorocarbons (HFCs)

- In September 2016, two recent rulemakings were signed to reduce the projected growth and emissions of hydrofluorocarbons (HFCs), a class of chemicals commonly used in refrigeration and air conditioning. The first rule, under the Significant New Alternatives Policy (SNAP) program, adds to the list of safer and more climate-friendly chemicals for use in specific sectors and changes the status of certain substances that were previously acceptable. The second rule, under Section 608 of the Clean Air Act, strengthens the refrigerant management program.
- For more information on the SNAP rule, please visit the following: <https://www.epa.gov/snap/snap-regulations>
- For more information on the Section 608 rule, please visit the following: <https://www.epa.gov/section608/revised-section-608-refrigerant-management-regulations>
- **Speaker:** Nancy Akerman, EPA's Office of Atmospheric Programs

EPA's 2016 Climate Change Indicators Report

- In August 2016, EPA released a report that shows compelling and clear evidence of long-term changes to our climate and highlights climate impacts on human health and the environment.
- This report, "Climate Change Indicators in the United States," features observed trend data on 37 climate indicators, including U.S and global temperatures, ocean acidity, sea level, river flooding, droughts, and wildfires. Within this report, some of the chapters highlight a specific region, data record, or area of interest (ex: stream temperature trends in the Pacific Northwest highlights how changes may affect salmon, a tribally important resource).
- For more information on this report, please visit: <https://www.epa.gov/climate-indicators>
- **Speaker:** Allison Crimmins, EPA's Office of Atmospheric Programs

News from the Roundhouse

The acorns are dropping! That can only mean it's fall, and the Berkeley Roundhouse has been staying busy during this busy time in the California Indian community. First, in late October the *News from Native California* crew, Terria Smith (Torres Martinez Desert Cahuilla) and Vince Medina (Chochenyo Ohlone), and Heyday's publisher and executive director, Steve Wasserman, attended the thirty-first annual California Indian Conference in San Diego, the homeland of the Kumeyaay people. It was a powerful weekend that connected California Indian people and educated the public about California's Native cultures at the same time. We were proud to represent Heyday and share the good work we do.

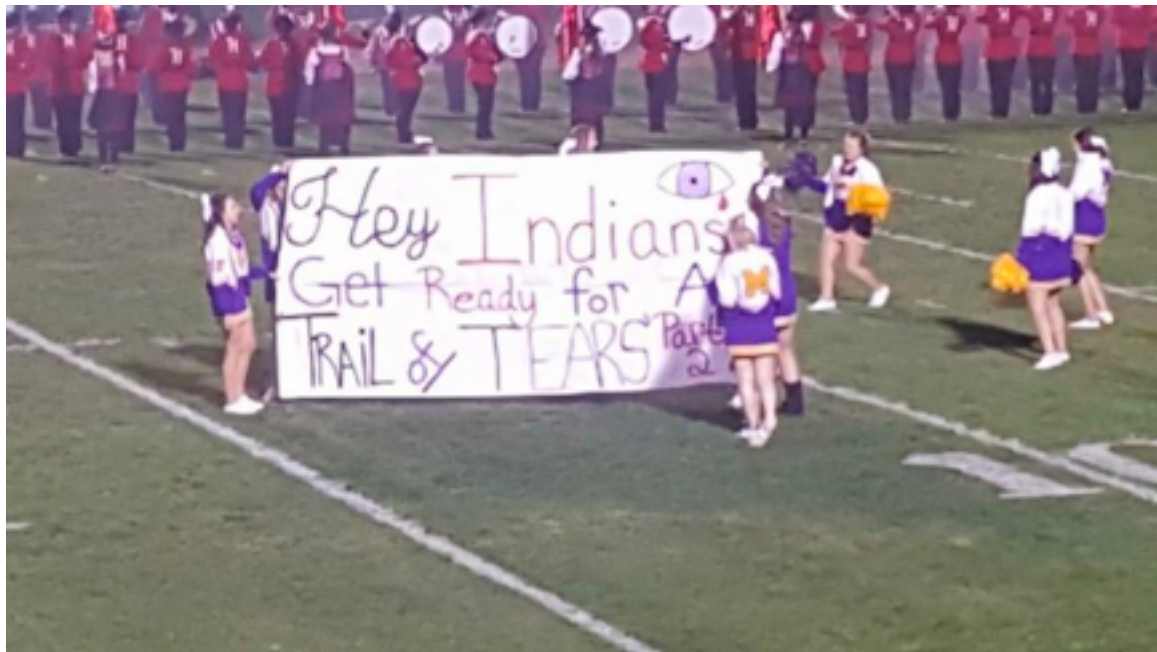

The Roundhouse has many more events lined up, including the third annual California Indian Market at the Oakland Museum of California, Friday, November 4 and Saturday, November 5, where close to twenty tribal vendors from across the state will sell unique handmade crafts and contemporary artisanal creations. Please join us if you can for this special event. Also, on Saturday, December 3, the Roundhouse will have a book table at the Dorothy Ramon Learning Center's art event.

Finally, the Fall 2016 issue of *News from Native California* is now available, featuring Chumash/Chicana artist Sarah Biscarra-Dilley (Chumash/Chicana). Order your printed copy [here](#). **And now you can order a digital copy, too--just click [here](#)!**

[Owner of Jackson Rancheria casino buys Amador County newspaper Ledger Dispatch](#)

Sacramento Bee -

The Indian tribe that owns Jackson Rancheria Casino Resort has entered the *newspaper* ...

I know you value the public lands surrounding Reno and Sparks as much as Dennis and I do! We don't want to see them swallowed up in yet more development, apparently Washoe County's plan, which would radically change our communities and diminish our quality of life, including our easy access to recreation in our beautiful open spaces. Here's an alert which Tina and I wrote for our friends and neighbors about the Wednesday Forum. Hope you can attend. If not, check back with me, as I've asked Washoe County for an email and snail mail address to which we can send comments. They haven't responded yet to our request yet. Thanks so much. Rose Strickland

Today, the Washoe County Commission offers us another opportunity to stand up for our public lands surrounding the Truckee Meadows and oppose selling off our public lands to accommodate future growth and expand our urban footprint into the hills and desert. When you look at the proposed disposal boundary map you will see a red line around and beyond our communities north to the Dogskin Mountains, west to Peavine Mountain, south to Pleasant Valley and east along the Truckee River to the Pyramid Lake Paiute Reservation, setting disposal plans for our open space lands now managed by BLM. These are the lands where we enjoy our freedom to hike, bike and explore and wildlife needs to survive.

Our community does need to grow but there is still much private land to develop. The county says that parks and trails will be established within the growth boundary; however, our Washoe

County Parks and Open Space Department was dismantled several years ago and pieces of the agency were dispersed within the Community Development Department due to inadequate budgets. These maps do not document where these parks and trails will go or how the county could afford to manage them. And, under an agreement with BLM, the county already can develop parks and trails on BLM land. In fact partnerships between the County, BLM, and the Forest Service are often essential because no agency has enough money or staff to do it all.

Here are links to the “growth boundary” map and the public land transfer map. See if your favorite local recreation areas will be sold for development.

- Washoe County proposed [Disposal Boundary map](#)
- Washoe County proposed [Land Transfer Request map](#)

Please join me and your neighbors next Wednesday at the Convention Center to help keep our recreation lands free and open to the public. Also, please help get the word out about this “under the radar” legislative proposal which facilitates urban sprawl around our communities and send this message to your friends and family. We need to send a strong message to our County Commissioners to drop the “disposal boundary” and other bad provisions in this bill (as soon as it is actually made available to the public).

Who: Washoe County Board of Commissioners

When: Wednesday, November 2 4:30-7:00PM

Where: Reno-Sparks Convention Center, 4590 So. Virginia St.

Why: Public Forum to Discuss the Proposed Washoe County Public Lands Bill
