Tremendous breakdown of what this all means, by fellow protector [Andy Pearson](#):

ARMY CORPS DECISION: WHAT DOES IT MEAN?

On Sunday afternoon, the U.S. Army Corps of Engineers denied the easement for the Dakota Access Pipeline to cross under the Missouri River at Lake Oahe, just north of the encampments at Standing Rock. This is amazing, virtually unprecedented, and a movement victory -- and the water protectors who have led the fight are right to claim it as such. It's also likely temporary and by no means the end of this fight. Here's some context and paths forward as best I understand right now.

WHAT HAPPENED: The Corps denied the easement and ordered an Environmental Impact Statement, which is a formal study which will compare various route alternatives. Denying the

easement was a stepping stone to getting to an EIS here for the Corps, and doesn't mean that the pipeline won't be built in its current alignment near Standing Rock eventually. The Corps is essentially hitting the pause button and initiating further study.

HOW DOES AN EIS GO? There are usually three phases to conducting an EIS: Scoping, Draft, and Final. The public can generally comment during each phase. The purpose of scoping is to identify what should be studied in the EIS -- the scope. Then the Corps and their EIS contractor

prepare and release a draft, which the public is invited to comment on. They then rework the draft in light of public input and release a final version, which the public can generally also comment on. The process usually takes several months, and can last for years depending on the project's complexity. A generic timeline would be about nine months, but we don't have any actual guidance yet on the timeline for this particular EIS.

FALLON PAIUTE-SHOSHONE TRIBE

**Official Ramah Navajo Chapter
Class Action Settlement
FPST DISBURSEMENT PLAN**

- Revised: 12/02/2016 -

The Fallon Paiute-Shoshone Tribe will receive \$1,088,685.82 as its portion of a settlement agreement with the U.S. Department of Interior for alleged underpayments of contract support costs by the Bureau of Indian Affairs (BIA) under the Public Law 93-638 contracts during fiscal years 1994 through 2013. The Fallon Business Council originally on November 15, 2016, adopted a plan based on a 50% per capita disbursement to all FPST members and 50% set-aside for gym renovation. After receiving public comment on November 22, 2016, as well as being informed that tax liabilities and implication of providing disbursement to minor's could create current and future issues, the Council adopted a new FPST disbursement plan by Resolution No. 16-F-230. Based on these discussions and evaluating the needs of the Tribe for various improvements and requests from the tribal membership for disbursement of the funds, the modified disbursement plan is as follows:

75% Disbursement to the FPST Tribal Membership

Total Disbursement Amount.....	\$816,514.37
Total Number of Adult FPST Members.....	1,153 (as of 10/1/2016)
Total Per Adult FPST Member.....	\$708.17/person

The disbursement will be included as a separate check mailed out with the regular Annual Settlement Fund Per Capita with a tentative mailing date of December 8-9, 2016. The Council regrets that disbursement cannot be made to our tribal minor's sub-account within the Settlement Funds as that these amounts are taxable income and Council does not want to place a future tax liability on these minors now and the future, as well as that if these amounts are commingled with the settlement fund sub-accounts it risks the possibility of making the entire sub-account becoming taxable to the IRS to the tribal membership cannot take place until the Tribe actually receives these funds.

NOTE: these funds are considered taxable income and due to the amount (over \$1000) the Tribe will have to send 1099 forms in early 2017. In accordance with the settlement website it states that "Settlement funds paid by a Class Member to individuals may be subject to income taxation and may impact an individual's eligibility for needs based programs."

25% Set-Aside for Capital Improvement Project

The remaining funds of \$272,171.46 are being set aside for helping the Tribe complete a major capital improvement project. The three identified projects are: (i) Renovation and/or Expansion of the Tribal Gym; (ii) Addressing issues with the Tribe's drinking water system (both on and off the Reservation); and (iii) Expanding the lagoon system on the Tribe's Reservation to avoid a public health safety issue.

365 Rio Vista Drive • Fallon, NV 89406 • Tel 775-423-6075 • Fax 775-423-5202

WILL THIS ACTUALLY STOP CONSTRUCTION?

Debatable. It would be illegal for Energy Transfer Partners to drill under the Missouri, but that's not to say they won't do it and opt to pay whatever legal penalties they incur. That would be a fairly shocking move on their part but they've hinted they may be open to doing it. It's easy to imagine that an incoming Trump administration would do their best to make the penalties as

minimal as possible.

WHY IS IT IMPORTANT FOR ETP TO DRILL RIGHT NOW? Contracts with oil shippers. These contracts, called take-or-pay contracts, obligate shippers to pay money to the pipeline company over a long, committed period of time regardless of whether they have oil to actually send or not. It's a great deal for DAPL but not so good for the oil shippers, especially now that the Bakken oil boom isn't so hot. These contracts expire if the pipeline isn't substantially complete by January 1, and there's somewhat of a chance that some shippers will choose to drop

out at that point due to changing economics in the industry if the pipeline isn't complete. Sunday's decision by the Corps means that the pipeline won't be complete by January 1 unless ETP breaks the law and drills anyway.

WHAT ABOUT TRUMP? Oh, you had to ask. He's a problem here. Once he's president, he'll be able to stack the deck at the Army Corps so that the EIS is weak or biased in favor of DAPL, and he might be able to stop the EIS process altogether and reinstate the permit, though I don't know the legal specifics here yet. It's very doubtful that we'll see a full and robust EIS with him taking office. The upshot of Sunday's decision as I see it, assuming that ETP chooses to follow the law, is that it delays approval of the line until after Trump takes office, giving time for the contracts to expire and letting the worst of winter slide by without the need for full forces at the encampments.

WHAT CAN WE DO IN THE MEANTIME? We can continue the work we've been doing, because it's all still relevant and helpful, and will become quite urgent again in at most a few months. We can go after the banks harder than ever to cut off funding to DAPL. We can continue to spread information, lobby elected officials, lobby the Corps, hold events, train for direct action. We can engage in the EIS process once it begins. This isn't the end of the fight by a long shot, but it's a brief respite between battles and a sign of how far we've come thanks to the indigenous leadership and water protectors at Standing Rock. Let's celebrate and reflect and keep fighting. [#NoDAPL](#)

Apply for A Grant

Rose Foundation administers a series of grantmaking funds (all listed below). Each fund has distinct eligibility criteria and scope of work that it supports. Each fund has distinct and separate application processes and deadlines. The Foundation generally discourages applicants from applying to more than one fund at the same time. Prospective applicants should:

1. Review our grantmaking Funds (listed below),
2. Determine the best fit for your organization and if it is accepting LOIs or applications,
3. Read the application instructions for that Fund and apply by the deadline [using our online system](#), and
4. Sign for up our RFP alerts for future grant opportunities [by clicking here](#).

ENVIRONMENTAL GRANTS

Rose Foundation administers numerous environmental grants funds, including two separate grassroots-oriented funds in California; watershed-oriented funds in California, Washington and Oregon; and place-based funds which generally operate on a county-specific level, as well as other specialized funds. Each fund generally has its own unique issue focus and/or geographic scope, and most funds have separate application processes. Prospective applicants should

carefully review the following fund descriptions, and follow the application instructions for the fund which is the best fit for their program.

Applicants from small organizations, or those who have minimal experience applying for a foundation grant, should probably review the Grassroots Grants below.

California Watershed Protection Fund

The California Watershed Protection Fund accepts applications for projects designed to benefit the water quality of many of California's watersheds. Due to fluctuations in the funding that supports the Watersheds Fund, the specific watersheds that are eligible may change periodically. Check the Eligibility Section for current watersheds.

Central Valley Disadvantaged Community Water Quality Grants Program

A new grants program designed to maximize the benefits to disadvantaged communities working on water quality issues in the Central Valley and Sacramento Valley areas.

Columbia River Fund The Columbia River Fund supports non-profit organizations dedicated to protecting and restoring the Columbia River watershed, and honoring the historical uses of the watershed while preserving fish and wildlife so that the Columbia River watershed will be healthy and productive in perpetuity.

Grays Harbor/Chehalis River Watershed Fund The Grays Harbor/Chehalis River Watershed Fund was established in order to improve the water quality of the Chehalis River Watershed and the Grays Harbor Estuary in Washington State.

Kern County Air Pollution Mitigation Fund

The Kern County Air Pollution Mitigation Fund fulfills the intent of a series of settlements between the Sierra Club and residential building developers in the Bakersfield area. It supports direct, pro-active projects in Kern County designed to reduce particulate or ozone air pollution.

Puget Sound/Salish Sea Watershed Fund

The Puget Sound/Salish Sea Watershed Fund supports physical projects or other on-the-ground work for physical improvements for the benefit of Puget Sound and the Salish Sea in the Whatcom, Skagit or San Juan County area.

Puget Sound Stewardship & Mitigation FundThe Puget Sound Stewardship and Mitigation Fund is dedicated to protecting the water quality of Puget Sound. It is open to a wide range of groups, from tiny grassroots groups to larger, established organizations.

Southeast Madera County Responsible Growth Fund The Southeast Madera County

Responsible Growth Fund was created to fulfill the intent of a settlement between the Madera Oversight Coalition and Castle and Cooke to encourage comprehensive environmental planning and responsible growth policies in Madera County.

The Mike Chappell Fund for the Spokane River

The Mike Chappell Fund for the Spokane River supports environmental project activities that will improve the water quality of the Spokane River Watershed.

GRASSROOTS FUNDS

Our Grassroots Funds award small grants to small community-based groups. Applicants' previous fiscal year's expenses must be \$100,000 or less to be eligible. We currently have two grassroots funds in California. Our Puget Sound Stewardship & Mitigation Fund also grants to groups of grassroots size.

Anthony Grassroots Prize The Anthony Grassroots Prize was established by environmental activist Juliette Anthony in 1999. The Anthony Prize recognizes an outstanding example of grassroots environmental stewardship over the previous year with a \$1,000 award.

California Wildlands Grassroots Fund To support efforts to preserve California's wildlands. Applications are reviewed quarterly. Emergency requests for funding are accepted.

Northern California Environmental Grassroots Fund The Grassroots Fund supports small grassroots groups throughout greater northern California (Santa Barbara and Kern Counties and all California counties to the north) that are tackling tough environmental problems including toxic pollution, urban sprawl, sustainable agriculture, climate change, environmental degradation of our rivers and wild places, as well as, of our communities and our health. Maximum grant size is \$5,000.

National Parks Centennial Celebration To honor the National Park Service's 100th birthday in 2016, the California Wildlands Grassroots Fund (Cal Wildlands) has created a one-time National Parks Centennial Celebration grantmaking program to support community-based celebrations and events across California.

CONSUMER PROTECTION & PRIVACY GRANTS

Rose Foundation administers consumer funds to address the issues of consumer privacy and financial education. Please review the individual fund descriptions and eligibility requirements to determine which fund is the best fit for your project.

Consumer Financial Education Fund

The Consumer Financial Education Fund supports projects that relate to consumer financial education, with an emphasis on issues related to large financial institutions, basic banking, access to financial services and retail banking accounts.

Consumer Privacy Rights Fund

The goal of the Consumer Privacy Rights Fund is to support projects that promote and preserve the privacy rights of consumers through public education campaigns, advocacy of consumer privacy rights, and/or research related to the preservation of consumer privacy rights.

Consumer Products Fund

The Consumer Products Fund was created to help consumers understand product labeling and the potential health impacts of product ingredients by promoting awareness about the nature of the ingredients in the products they purchase, such as whether products are “natural,” and to promote truth-in-labeling and required warnings and disclosures.

COMMUNITY LEADERSHIP PROJECT

The Community Leadership Project is a joint effort of the David and Lucile Packard, James Irvine and the William and Flora Hewlett foundations to build the capacity of community-based organizations serving low-income people and communities of color. As a part of Community Leadership Project (or CLP) the Rose Foundation will support 9 San Francisco Bay Area organizations over a 3-year period to help them strengthen their leadership, become more financially stable and resilient to changing conditions. The Community Leadership Project grantees have been chosen. It is not possible to apply to this fund.

HOW TO APPLY

Instructions for Online Grant Submissions We have several of our grantmaking funds on an online grant system. Please read these tips before starting your application. You can also return to an application you’ve already started by clicking on the link below.

Jan. 24-26, 2017 DEVELOPING AND IMPLEMENTING A TRIBAL RECYCLING PROGRAM (ITEP) Palm Springs, CA

The Institute for Tribal Environmental Professionals' new course will have a strong emphasis on

creating a recycling program from the ground up. Three different tribal professionals will discuss common obstacles, how to build your team, understanding recycling markets, equipment needs, facility design and operations, and give case study examples of different approaches. Attendees will also participate in a variety of small group activities so they can work directly with their fellow tribal professionals, putting into practice what they learn during the lectures. In this course, we will have the opportunity to visit TWO different tribal recycling programs: 29 Palms Band of Mission Indians and Morongo Band of Mission Indians. As part of this training we will be visiting their facilities and talking with their staff about how they met various challenges and developed successful approaches to recycling. This course will be limited to twenty participants. For more info., and to apply, contact Julie Jurkowski at [HYPERLINK "mailto:Julie.Jurkowski@nau.edu" Julie.Jurkowski@nau.edu](mailto:Julie.Jurkowski@nau.edu)

National Port Strategy Assessment Webinar - Solid Waste Management Grants, USDA
Details at <http://www.rd.usda.gov/programs-services/solid-waste-management-grants%20>
Funding Opportunity Number: SWMFY2017 Application closes December 31, 2016.

This program helps reduce or eliminate pollution of water resources through funding for organizations that provide technical assistance or training to improve the planning and management of solid waste sites. Who may apply?

- Most State and local governmental entities
- Non-profits
- Federally Recognized Tribes
- Academic Institutions

What may the funds be used for?

- Evaluate current landfill conditions to identify threats to water resources
- Provide technical assistance or training to enhance the operation and maintenance of active landfills
- Provide technical assistance or training to help communities reduce the amount of solid waste coming into a landfill
- Provide technical assistance or training to prepare for closure and future use of a landfill site

February 1, 2017 2017 Healthy Watersheds Consortium Grant Program, U.S.
Endowment for Forestry and Communities

Details at <http://www.usendowment.org/healthywatersheds.html>

Application closes February 1, 2017. Funding amount: \$50,000 - \$300,000

The U.S. Endowment for Forestry and Communities (Endowment) seeks applications for the 2017 Healthy Watersheds Consortium Grant Program. The Healthy Watersheds Consortium Grant Program goal is to accelerate strategic protection of healthy, freshwater ecosystems and their watersheds. This goal will be achieved by:

- Developing funding mechanisms, plans, or other strategies to implement large-scale watershed protection, source water protection, green infrastructure, or related landscape conservation objectives;

- Building the sustainable organizational infrastructure, social support, and long-term funding commitments necessary to implement large-scale protection of healthy watersheds; and
- Supporting innovative or catalytic projects that may accelerate funding for or implementation of watershed protection efforts, or broadly advance this field of practice.

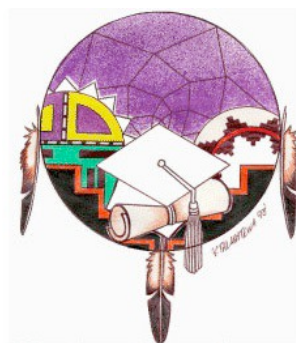

Eligible applicants include not-for-profit 501(c)(3) organizations, for-profit companies, tribes, intertribal consortia, interstates, state, and local government agencies including water utilities and wastewater facilities, and colleges and universities are eligible for funding.

## HOW TO FIND AND WIN SCHOLARSHIPS

By Dean Chavers, Ph. D.

**MANDATORY--YOU MUST READ THIS!**

### BACKGROUND

**Catching the Dream**, formerly known as the **Native American Scholarship Fund**, makes grants to Native college students and works to improve Indian schools. Since 1986, CTD has made scholarship awards to 960 students and has produced 552 graduates. Our completion rate is 85%, a very high rate compared to the 18% completion rate that prevails nationwide with Native students.

Contrary to what students often think, CTD rewards students for finding and winning scholarships.

Many students think the fewer scholarships they find and win, the more we will like it. **The opposite is true.** The more scholarships you find and win, the more we like it, and the more money we will give you. Our ultimate goal is to have you being able to go to college with no loans and **have your expenses totally covered.**

Many students think they cannot afford to go to Stanford or Harvard. The total cost for a year at the Ivy League colleges is now **\$64,000**. But really solid, hardworking, dedicated, serious students can win enough money in scholarships to be able to attend Stanford or Harvard. The secret is scholarships.

We will help students with their scholarship search, with their scholarship planning, and with their essay. We will help you with your essay at any time. Our critique of it is free! Please call us with any questions whatsoever. Nothing is too unimportant to ask us about. The only silly or stupid question is the one you do not ask. Please use us freely as a resource. (Send it to Dean Chavers in Word format or pdf.)
