Interior Secretary Recommends Shrinking Borders of Bears Ears Monument By JULIE TURKEWITZ and CORAL DAVENPORT

Ryan Zinke's proposal for the Utah conservation area is being watched closely as an indicator of how the Trump administration will treat public lands.

Zinke Calls for Scaling Back Bears Ears National Monument

**Taking  
Alcatraz -  
Film  
Screening  
and Panel  
Discussion**

The California Historical Society is proud to present a special screening of the documentary film, *Taking Alcatraz* - a short film about the American Indian occupation of Alcatraz Island in 1969. The screening will be followed by a panel discussion with the filmmakers, John and Grace Ferry, leading American Indian and social justice activists, Eloy Martinez, Mary Crowley, Alan Harrison, Dr. Larry Brilliant, Sacheen Littlefeather, and amazing local photographer Ilka Hartmann. This program is presented in collaboration with the New Museum Los Gatos exhibition *Cement Prairie: The History and Legacy of the 1952 American Indian Urban Relocation Program*, which closes on June 25.

Today's selection -- from *Scars of Independence* by Holger Hock. Histories of the American Revolution tend to gloss over the violence of that war, often leaving the impression that it was a civilized war. These same histories tend to minimize the presence of colonials that remained loyal to the British crown. Yet it was a violent, cruel war, and this violence was often savagely played out conflicts between those colonials who wanted to separate from Britain [Patriots or Whigs] and those who remained loyal to the crown [Loyalists or Tories]:

"The night after the battle [of Kings Mountain in 1780] presented a grim scene: 'The groans of the wounded and dying on the mountain were truly affecting- -- begging pitteously for a little water; but in the hurry, confusion, and exhaustion of the Whigs, these cries, when emanating from the Tories, were little heeded.' ... The following day the Patriot James Collins witnessed local Loyalist wives and children finding their 'husbands, fathers, and brothers, [lying] dead in heaps, while others lay wounded or dying.' The Goforth family had three Loyalist and two Patriot sons; four of them fell on Kings Mountain. ...

"The victors inspected [a Loyalist's] bullet-riddled body for evidence of their marksmanship. They then stripped it for souvenirs and, according to local tradition, urinated on it. Later, though, the Patriots allowed the Loyalists to wrap up the corpse in a cowhide and bury it. Both sides hastily buried their other dead, covering them so thinly with logs, tree bark, and a few rocks that the bodies soon fell prey to scavenging animals. Roaming wolves attracted to the corpses made it too dangerous for locals to venture out at night. Half of the region's dogs had to be put down when they went 'mad.' People even refused to eat their fat hogs, as they had 'gathered in to the place, to devour the flesh of men.' ...

"On October 14, Patriot leaders held what one Loyalist dismissed as a mock trial of men whom their rebel enemies accused of murder, arson, or robbery. Colonel Ambrose Mills was charged with inciting the Cherokees to make war on the South Carolina frontier. Of some thirty-six Loyalists tried and up to thirty condemned to death, the Patriots hastily hanged nine on a tree before reprieving the others and moving on, lest British forces surprise them. [Loyalist] Colonel Mills's wife had said farewell to her husband just before his execution; she and her young child were now seen sitting through the rainy night alongside the colonel's corpse. Together with an old farmhand, the widow of a Loyalist who had just been killed on the mountain cut down the last bodies and buried them in a shallow trench. ...

"Washington's new man in the South ... General Nathanael Greene ... found 'nothing but murders and devastations in every quarter' as Patriots and Loyalists 'pursue[d] each other with as much relentless fury as beasts of prey.' Both sides seemed bent on mutual annihilation, worried Greene, and unless 'those private massacres' ended, 'this Country will be depopulated ... as neither Whig nor Tory can live.' Writing to his wife, Catherine, from camp at Little River, a frustrated Greene exclaimed: 'My dear you can have no Idea of the horrors of the Southern war. Murders are as frequent here as petty disputes are to the Northward.'

"As both Patriots and Loyalists recognized the war in the South as particularly violent, predictably, each side blamed the other. Among the most notorious rebels was Colonel Benjamin 'Bull Dog' Cleveland, who terrorized Loyalists in the Yadkin country. When Ferguson's proclamation just before Kings Mountain mentioned the rebels 'murdering an unarmed son before the aged father, and afterwards lopped off his arms,' he was referring to an infamous incident involving the 'Bull Dog.' In another instance, Cleveland's men broke out two Loyalists from a prison, stood one of them 'on a log, put the noose around his neck, threw the end of the rope over a tree limb, fastened it, and kicked the log out from under him.' Cleveland then gave the second Loyalist a choice: he, too, would be hanged, unless he cut off his own ears. The man grabbed a knife, sliced off his ears, and was let go."

**At LONG Last, the COVFEFE Act Is Introduced!:** President Trump's tweets would be preserved as presidential records if House Representative Mike Quigley's proposed [COVFEFE Act](#) becomes law. The "Communications Over Various Feeds Electronically For Engagement" Act (yes folks, that spells 'Covfefe'! Holy brilliance!) would amend the Presidential Records Act and require the National Archives to store presidential tweets and other social media interactions, in addition to prohibiting the president from deleting his posts. "If the president is going to take to social media to make sudden public policy proclamations, we must ensure that these statements are documented and preserved for future reference. Tweets are powerful, and the president must be held accountable for every post," Quigley said in a statement.

White House spokesperson Sean Spicer seems to agree, so that's convenient. Last week, he said that Trump's tweets "are considered official statements by the president of the United States." Trump has more than 32 million followers on Twitter for his personal @realDonaldTrump profile. He (in)famously tweeted the following on May 31: "Despite the constant negative press covfefe." The message remained posted for hours but was later deleted. Trump's next communication a few hours later made light of the tweet, saying: "Who can figure out the true meaning of 'covfefe'??? Enjoy!"

\*\*\*\*\*

**Today's selection -- from *Amazons* by Adrienne Mayor.** With the current success of the movie *Wonder Woman*, who is presented in the movie and in comic books as having come from among the Amazons, we take a brief look at the origin of these warriors:

"Who were the Amazons?

(pic) Amazon wearing trousers and carrying a shield c.470 BC, British Museum, London.

"In Greek myth, Amazons were fierce warrior women of exotic East-ern lands, as courageous and skilled in battle as the mightiest Greek he-roes. Amazons were major characters not only in the legendary Trojan War but also in the chronicles of the greatest Greek city-state, Athens.

"Every great champion of myth -- Heracles, Theseus, Achilles -- proved his valor by overcoming powerful warrior queens and their armies of women. Those glorious struggles against foreign man-killers were re-counted in oral tales and written epics and illustrated in countless art-works throughout the Greco-Roman world. Famous historical figures, among them King Cyrus of Persia, Alexander the Great, and the Roman general Pompey, also tangled with Amazons. Greek and Latin authors never doubted that Amazons had existed in the remote past, and many reported that women living the life of Amazons still dwelled in lands around the Black Sea and beyond. Modern scholars, on the other hand, usually consign Amazons to the realm of the Greek imagination.

"But were Amazons real? Though they were long believed to be purely imaginary, overwhelming evidence now shows that the Amazon traditions of the Greeks and other ancient societies derived in large part from historical facts. Among the nomad horse-riding peoples of the steppes known to the Greeks as 'Scythians,' women lived the same rug-ged outdoor life as the men. These 'warlike tribes have no cities, no fixed abodes,' wrote one ancient historian; 'they live free and uncon-querred, so savage that even the women take part in war.' Archaeology reveals that about one out of three or four nomad women of the steppes was an active warrior buried with her weapons. Their lifestyle -- so dif-ferent from the domestic seclusion of Greek women -- captured the imagination of the Greeks. The only real-life parallels in Greece were rare instances of wives forced to defend their families and towns against invaders in the absence of their husbands.

(pic) A helmeted Amazon with her sword and a shield bearing the Gorgon head image,  
Tondo of an Attic red-figure kylix, 510-500 BC

"The myth of Atalanta [a heroic woman in Greek lore] seems to suggest that a girl raised in a natural state would grow up to be something like an Amazon. In reality, 'going Amazon' was an option for girls who had been raised since childhood to ride horses and shoot arrows on the steppes. The 'equalizing' combi-nation of horseback riding and archery meant that women could be as fast and as deadly as men. Whether by choice or compelled by circum-stances, ordinary women of Scythia could be hunters and warriors without giving up femininity, male companionship, sex, and motherhood.

"The universal quest to find balance and harmony between men and women, beings who are at once so alike and so different, lies at the heart of all Amazon tales. That timeless tension helps to explain why there were as many love stories about warrior women as there were war stories. ...

"And the Greeks were not the only ones to spin tales about Amazons. Thrilling adventures of warrior heroines of the steppes were told in many ancient cultures."

DINNER TO FOLLOW BURIAL  
FOOD DONATIONS ARE APPRECIATED

The announcement features a portrait of Gordon L. Frazier, a man wearing a cowboy hat and a plaid shirt, smiling. The background of the announcement is a warm, golden-hued image of a person riding a horse across a field.
