Upcoming documentary focuses on Eel River salmon, dams, pot and more

Will Houston, Eureka Times-Standard

As California's third largest river basin, the Eel River has many stories — stories of destruction, death, and overconsumption, but also of life, rejuvenation and natural bounty. For documentary filmmaker, fisherman and former Humboldt County resident Shane Anderson, the river's tale had yet to receive its proper telling.

from Dennis M: newsreview.com/reno/evidence-first/content?oid=24093547

In 1793, President Washington was under heavy pressure to launch a war against the Chickamauga nation. He put the issue before Congress and Congress declined to declare war. On August 28, Washington informed a southern governor who had been calling for war, "The Constitution vests the power of declaring war with Congress; therefore no offensive expedition of importance can be undertaken until after they have deliberated upon the subject, and authorized such a measure."

Rights guy By Dennis Myers dennism@newsreview.com

David Kladney, a former Reno journalist and now an attorney, has been a member of the U.S. Commission on Civil Rights since 2011. Italics reflect emphasis in his voice.

How did you get on the commission?

The makeup of the commission is no more than four people can be from one political party. The president of the United States gets four appointments. The minority leader and the speaker in the House each get an appointment, and the majority leader and minority leader in the Senate each get an appointment. I was appointed by Sen. Reid in 2011. So I've been sitting there for five, five and a half years.

What does the commission do?

What we do is we investigate subjects on civil rights. We don't investigate cases. For instance, I think I spoke [at a Nevada Women's Lobby meeting] about sexual assault in the military. We did a report on that. We've had a report on patient dumping—sending them out on buses. We've done a lot of reports. You can look on the website and see the list. We did a report on police use of force. It hasn't been issued yet. I'm sure the report will come out and make recommendations [such as] what data needs to be collected in the future. One of the things we found out was that there wasn't sufficient data that is kept by police departments throughout the country. For instance, there are about nine hundred and something, maybe close to a thousand, citizens shot to death every year by police officers. There's 225, I think, police officers lost their lives in 2016 or 2015. More than a quarter of that thousand number were mentally disabled. So the question

comes, are the officers prepared to handle those situations as best as they can be, and are the officers protected enough so that few of them will get injured, either, because it's a dangerous job? Perhaps we can save lives on both sides of that equation. So those are the kind of things we looked at. We looked at religion and the accommodations that are supposed to be made to religious folks—where they can pray, where they shouldn't. Like in college campuses, things like that. So we have quite a broad portfolio.

Carson Valley Job Expo is on May 3 at the Douglas County Community and Senior Center, on Waterloo Lane, hosted by the Carson Valley Chamber of Commerce and Douglas County Social Services. Details in the attached flyer.

If attending this Job Expo, please be sure to:

- (1) Bring 20 copies of your Resume.
- (2) Bring your portfolio binder, with application information and certificate(s) earned, in case you are asked to fill out an employment application on site.
- (3) Dress to Impress for an "On-The-Spot" Interview. Talent Recruiters are looking and first impression counts!!
- (4) If you have a "Smart Phone" view a company's mission statement, if you are interested to talking to a Talent Recruiter.

- (5) Review job qualifications and think about how your “Skill-Set” will match these qualifications.
- (6) Practice “The 30 Second Me”, so you are ready, if a Talent Recruiter should ask.
- (7) Keep in mind, employers are attending this Job Expo to fill vacant positions and the candidate selected could be YOU!!

Have a GREAT week! Please post and share.

A New Data Set to Keep a Sharper Eye on Land-Air Exchanges

EOS.org

(Twitchell Island focus) The turn of the millennium marked a decade of systematic measurements of exchanges of carbon, water, and energy between the biosphere and the atmosphere, made by a few pioneering scientists at their own study sites. New knowledge was—and still is—generated from these data at individual sites. It quickly became clear, however, that pooling together data from multiple sites would create a whole that is greater than the sum of its parts: a powerful tool not only for comparing and combining sites but also for studying land-air exchanges at regional and even global scales.

Moving Native Poem Wins Poetry Contest from powwow.com

"My Once Life" is a hybrid video poem about the continuing impact of colonization on tribal peoples. Native people resist their violent history and contemporary political struggles through engaging with deep historical knowledge and creating new oral histories.

The poem is read by 12 Native women living in Los Angeles whose strong voices embody empowerment: Nanabah Hill, (Navajo-Oneida), Diana Terrazas, (Paiute),

Nanabah Hill, (Navajo-Oneida), Diana Terrazas (Paiute), JaNae Collins (Dakota-Crow), Xelt'tia Temryss Lane, (Lummi Nation), Viki Eagle Sicanqu (Lakota-Sioux), Cheyenne Phoenix (Northern Paiute-Navajo)

Watch a Sneak Peek of Navajo Thriller, 'The Red Hogaan'

I hope you're not watching this at night, or alone!

Now that I've warned you, you have to check out this trailer of The Red Hogaan, a Kody Dayish Production. The production company was started by Navajo siblings, Kody, Kolette and Kolin. The production company was started by Navajo siblings, Kody, Kolette and Kolin and

The production company was started by Navajo siblings, Kody, Kolette and Kolin and The Red Hogaan is the first feature-length film.

Ooooh, I got chills watching that one. I can't wait to see the full movie! In an interview with DGO magazine, the release date is not yet known, but they do plan on releasing in 2018.

Walmart just pledged to eliminate a billion tons of greenhouse gas

That's as much as [Germany's](#) yearly emissions.

It's hardly the first example of a business charging ahead on climate change mitigation while governments dither. Pretty much every giant corporation has made a commitment to reduce its emissions: food titan Unilever, everything maker General Electric, and IKEA (where you get your [OMLOPPs](#)), and on and on.

But what Walmart does matters. The company is such a behemoth that its policy changes trigger transformation around the globe. Walmart is the [10th largest economic entity in the world, after Canada](#), so this effort, dubbed "Project Gigaton," is akin to every Canadian signing on to a strict sustainability plan.

Most of Walmart's environmental footprint comes from other businesses extracting raw materials to manufacture Walmart's products. So it will be [pushing its suppliers to clean up their act](#), aiming to slash a gigaton of greenhouse gas emissions from its supply chain.

The Environmental Defense Fund has been working with Walmart to cut its emissions for years, and so there's a track record here. In 2010, Walmart pledged to cut 28 million metric tons (like removing 6 million cars from the road), then surpassed that goal in five years. Now, they're aiming to meet a goal 35 times larger, by 2030.

Grist 50 [Anna Carson DeWitt](#)

Meet the fixer: This farmer gives vets a chance to grow

Fred Lewis served with the Special Forces in Afghanistan until he took a sniper's bullet to the helmet. Nursing his injury, he returned to Kentucky, where his older brother, Mike, lived in a rural area with a lot of poverty and addiction. Working in agriculture was the one thing that gave Fred peace, but farming paid next to nothing. "It was just impossible to make a living," says Mike. "It just seemed kind of shitty to see someone, who served his country, come home and find that the only job available was at a call center fielding complaints about Veterans Affairs."

So Mike started the organization [Growing Warriors](#) to figure out how to make farming profitable for returning veterans. The Lewis brothers have since started 10 community gardens that employ vets across Kentucky and North Carolina and one 500-acre farm with three to four full-time veteran interns working the land.

Growing Warriors has probably gotten the most attention for growing five acres of industrial hemp. Mike envisions a network of small hemp-processing mills throughout the region, providing markets for small farmers. With outdoor gear company Patagonia pushing to establish a legal U.S. hemp market, Mike and company could be sparking a new agricultural movement.

From: O'Neil, Carolyn J **Subject:** A Message from the SWONAP Administrator

Aaniin; "Greetings"!

It is with mixed emotions that I'm announcing my retirement and my last day to work for HUD/ SWONAP. I'll be heading back to Michigan on April 28, 2017. Although I'm looking forward to being with family again, I'll be leaving a bit of my heart in the southwest.

It has been a privilege to serve you as the Administrator of the Southwest Office of Native American Programs for nine years. I'll have many wonderful memories and stories of strength and determination of tribes in the southwest, which I will share with my family and my own tribe in northern Michigan.

I've had the honor to meet and speak with many of you. You've shared your challenges, and I've witnessed the perseverance in overcoming many of those challenges. The tribes in the Southwest will always have a special place in my heart. You each have unique situations to deal with, the unforgiving desert, and then flooding, minimal funding, small land bases and vast, large land bases with little or no infrastructure, no resources, and no employment opportunities. Yet, you meet them head-on and continue to identify new funding opportunities to provide housing, employment, homeownership and other services, there have been so many success stories shared, and there are many more yet to occur! There isn't enough time to speak with each of you, however even then I couldn't adequately convey the depth of my pride and admiration for the work you do.

The SWONAP Administrator's position will be posted in the near future, and in the meantime you can rest assured the very capable staff here will continue to be your advocates and provide services, training and technical assistance. David Southerland will be Acting Administrator effective May 1, 2017.

I wish you all the best with your projects and plans, I'll be keeping tabs on Indian Country! I may be away from the southwest, but Indian Housing will always be a priority with me.

Miigwech, "Thank you"

Carolyn O'Neil, Administrator, [U.S. Dept. of Housing and Urban Development](#), [Southwest Office of Native American Programs](#), One N. Central Avenue, 6th Floor, Phoenix, AZ 85004

Poachers Kill Over 20,000 Reindeer in Russia To Send Their Tongues To China by jonathanturley

WWF Russia

We have previously discussed how the growing Chinese market for exotic animal parts is wiping out the world's populations of endangered and threatened animals. This week the extent of that slaughter was brutally evident in Russia where poachers have killed over 20,000 reindeer . . . only to cut their tongues out and leaving miles of rotting
