The state offered meals, lodging, a medical exam and a bus ticket to protesters who left by the Wednesday afternoon deadline.

Interior Department Produced Memo On Dakota Access Pipeline That Trump Doesn't Want Public To Read

Interior Department's top lawyer produced memo in December detailing how Dakota Access pipeline violates treaty rights of Native Americans. shadowproof.com

Bucky Harjo

What is happening this moment in Standing Rock should not be happening, where are our Leaders of our Nations and why are they allowing this to happen, we all should be united on this, and this should not be happening the way that it is as we are watching on live feeds! We have been through so much in history, we are mocked at sporting events, in movies, apparel, music, and it has come time to end all of this hatred to Indigenous Peoples. Our rights are being violated and trampled upon as the land at Oceti Sakowin is being trampled on!

Armed occupation brought an anticlimactic and forlorn end to the camp, which had been home to thousands of activists opposing the Dakota Access pipeline [Read the full story](#) Shared from [Apple News](#)

From the Eagle Watch February 24, 2017

We start with a short account regarding the historical events of February 1973 which was commemorating historical events of 1890. We understand that history does repeat itself. And that there is no neo colonialism, COLONIALISM never stopped! It's a mentality that plans to colonize space yet we predict its horrific demise soon...but how soon?? 50 years is not long in geological time but it is a life time for many humans.

A shift in consciousness is coming. Hang on folks, it's still a ruff ride!!
Kittoh

Wounded Knee incident - From Wikipedia, the free encyclopedia
Not to be confused with Wounded Knee Massacre.

Wounded Knee Siege - Part of the Red Power movement
Date February 27, 1973 [A] May 8, 1973
Location Wounded Knee, South Dakota, United States
Result: Siege ended, Wounded Knee back to government control

Belligerents: American Indian Movement United States U.S. Marshals Service
 United States Federal Bureau of Investigation
 Commanders and leaders: Dennis Banks, Russell Means United States Richard
 M. Nixon, United States Richard A. Wilson, United States Wayne B. Colburn,
 United States L. Patrick Gray, United States William D. Ruckelshaus

Casualties and losses: 2 killed, 13 wounded 2 wounded[1]

The Wounded Knee incident began on February 27, 1973, when approximately 200 Oglala Lakota and followers of the American Indian Movement (AIM) seized and occupied the town of Wounded Knee, South Dakota, on the Pine Ridge Indian Reservation. The protest followed the failure of an effort of the Oglala Sioux Civil Rights Organization (OSCR) to impeach tribal president Richard Wilson, whom they accused of corruption and abuse of opponents. Additionally, protesters criticized the United States government's failure to fulfill treaties with Native American people and demanded the reopening of treaty negotiations.

Oglala and AIM activists controlled the town for 71 days while the United States Marshals Service, FBI agents, and other law enforcement agencies cordoned off the area. The activists chose the site of the 1890 Wounded Knee Massacre for its symbolic value. Both sides were armed, and shooting was frequent. A U.S. marshal was shot and paralyzed in March.[2] A Cherokee and an Oglala Lakota were killed by shootings in April 1973. Ray Robinson, a civil rights activist who joined the protesters, disappeared during the events and is believed to have been murdered. Due to damage to the houses, the small community was not reoccupied until the 1990s.

----- Original Message -----
History is repeating itself as heavily militarized United States law enforcement storm Native American treaty land to run them off- only this time they are riding in Humvees and not on horses.

Unarmed water protectors that are praying get weapons pointed at them. Many independent journalists were arrested. One, Eric Poemz, had his hip broken by militarized police and they tried to stand him up on a broken hip.

ABC was given press credentials and was filming right next to cops while independent media was denied. On top of that independent media gets tackled, gets a broken hip and is arrested. There was previous coverage of the pipeline company driving dump trucks full of garbage into the camp and dumping it to purposely and falsely depict the camp as leaving heaps of garbage. This is the type of coverage people will see on mainstream news.

APTN has the best available to people who can't get internet alternative news.

Today's selection -- from Timeline Hawai'i by Daniel Harrington. Ancient Polynesians sailed thousands of miles in primitive canoes to colonize the most remote landmasses in the Pacific Ocean:

"The ancient Polynesians were master navigators who for thousands of years sailed their double-hulled voyaging canoes long distances to inhabit hundreds of Pacific islands. They finally discovered the Hawaiian Islands, an isolated island group of less than 6,500 square miles in the middle of the vast 70 million square mile Pacific Ocean.

"These seafarers navigated the oceans guided only by clues provided by nature -- the positions and movements of the sun, the moon, the stars, constellations, the pre-vailing winds and seas, and the flight patterns of birds. They likely began their west-to-east journeys when westerly winds replaced the prevailing easterly trade winds so if they failed to find land, they could wait for the trade winds to return and carry them home. To determine the direction toward Hawai'i they relied on the star that Westerners call Polaris or the North Star. Their word for this was Hokupa'a, meaning Fixed Star, because it is located due north and appears 'fixed' in the sky.

"They also relied on their knowledge of the daily feeding and seasonal flight cycles of birds. Migratory birds such as the Pacific golden plover and the ruddy turnstone winter on central Pacific islands and then in April or May head back to their arctic breeding grounds. Sighting them revealed that somewhere to the north or northeast there was land.

"Also helpful were the flight directions of pelagic (oceanic) birds, including petrels, shearwaters and albatrosses. Pelagic birds spend most of their time over the ocean seeking fish, squid, and crustaceans and then return to land during the nesting season. Non-pelagic birds such as boobies, terns and tropicbirds all feed over the sea by day but return each night to their land homes. Seeing them at dusk meant land was nearby. During their open ocean journeys, the navigators also looked for birds congregating over feeding areas to reveal locations where fishing would be productive.

A Polynesian double-hulled canoe

-- by John Webber, of Captain Cook's crew, Hawaii 1779

"Ancient Hawai'i's social structure was based on fairly rigid castes, but with a system of communal sharing of the natural resources according to wedge-shaped land divisions known as ahupua'a. The ahupua'a were defined by natural boundaries of mountain ridges and ocean bays and extended from the high valley to the sea including the offshore coral reefs. Within them could be found all the resources necessary to sustain life.

"When Captain Cook and his crew established Western contact in 1778, they found a friendly, self-sufficient and productive people with a culture as highly developed as many found in feudal Europe.

Introduction to Start-Up Financing - Wednesday, March 8

NCET is pleased to present this special panel of experts who will cover the why, what, when and how of startup financing. You'll hear from industry experts and startup investors who'll share insights on how to build and fund a successful business.

Why Should You Attend? Topics include:

- Why raise funds?
- How to determine your capital requirements
- Different modes of funding available: crowdfunding, F&F, angels, VCs, etc.
- Different types of instruments: Notes, KISS, SAFE, etc.
- When to raise funds, how much to raise, and from whom
- Learn how to structure a company for seed, angel and venture capital investment
- Understand the best practices in identifying and approaching potential investors, and what motivates them: return, involvement, etc.
- What investors are looking for:
 - Valuation
 - Management team
 - Use of funds
 - Competitive advantage
 - Exit strategy
- Learn what methodologies to use in determining valuation
- Understand negotiation and documentation of Term Sheets
- Why you need - or don't need - a Board of Directors or a Board of Advisors
- How to structure your pitch
 - Determining valuation, cap tables; term sheets and negotiation.
 - Timing of funds requirements

Who Should Attend?

- Entrepreneurs and Companies looking to raise funds
- C-level and Senior Management
- Individual, Private and Institutional Investors
- Professional Advisers, Law Firms and Consultants

Panelists include:

- Doug Erwin - Vice President for Entrepreneurial Development, EDAWN (Moderator)
- Kevin J. Lyons - Co-Founder and CEO, Governance Sciences Group
- Craig Macy - Of Counsel, Fennemore Craig
- Kathie Priebe - Reno Angels, Sierra Angels, Summit VMS and Golden Seeds

Read our panelist's bios [here](#)

NCET members may bring an unlimited number of guests at member prices. Join before you RSVP for this event and your savings will pay for some of all of your membership! Memberships start at just \$50 so [join now](#) and save.

Wednesday , March 8

Networking: 11:00 am - Noon

Lunch and Program: Noon - 1:30 pm

Prices: \$40 - NCET members / \$50 - non-members

Tables for 8 - includes premium location at front of room, table signage and recognition from the podium during the luncheon.

- \$320 - NCET members / \$400 - non-members

RSVP **EARLY** so you don't miss this great event.

The *Fine Print* :

- Advance reservations required. RSVP by midnight on March 7. (Walk-in registration is not available.)
- You are encouraged to pay in advance - there is a \$10 service charge for payment at the door.
- No-shows will be charged the full amount of the reservation unless cancelled at least 48 hours prior to the event.

Here's another way you can help the planet right now: let your purchases help fund the future you want to see.

We worked hard to find a bank that doesn't invest in dirty energy, has never earned a dime on fossil fuels, and would never consider funding a pipeline. We found Beneficial State Bank in 2013, and have been proud partners in offering a [Sierra Club Visa® Platinum Credit Card](#) for almost four years.

Given the current social and environmental moment, it's vital we use every tool available to us to stand up for what is fair and just. Your everyday purchases are powerful, and you have a choice--fund environmentally destructive projects, or divert your dollars to a bank that's fighting for the same future you are.

As a [completely transparent community bank](#), Beneficial State is proving you can balance environmental sustainability, social justice, and profitability.

*Because its Friday and we need
a little cute humanity.*
