We'll Soon Be Using More Than Earth Can Provide

By David Korten

Four days after President Trump announced the U.S. would withdraw from the Paris climate agreement, the Global Footprint Network (GFN) reported that **Earth Overshoot Day 2017 will fall on Aug. 2**. Most Americans likely have no idea what that means.

The basic point is quite simple: From Jan. 1 to Aug. 2, the world's 7.5 billion people will have used as much of Earth's biological resources—or biocapacity—as the planet can regenerate in a year. During the remaining five months of 2017, our human consumption will be drawing down Earth's reserves of fresh [water](#), fertile [soils](#), forests and fisheries, and depleting its ability to regenerate these resources as well as sequester excess carbon released into the atmosphere. Keep reading...

Video: Humans Are Driving the Next Mass Extinction

"Species are like a house of cards, you can't just sort of take one card out of the deck and not expect the deck to crumble," said Dr. Michael Novacek, curator of paleontology at the American Museum of Natural History, in this reality-driven video by [Racing Extinction](#).

As the video above clearly shows, human activity is directly linked to mass extinction of the world's most [endangered species](#).

Watch as renowned film director and co-founder of [Oceanic Preservation Society](#), Louie Psihoyos, explains how "there's this incredible web where we're all connected, and when we start to lose these linchpin species, the environment starts to fail."

Al Gore: Trump Fails to Derail the Energy Revolution

By Paul Brown

Donald Trump "cannot rewrite history," and no matter what he says or does the Paris agreement to limit climate change will survive and is even stronger as a result of Trump's rejection. This is the verdict pronounced by a former U.S. vice-president turned climate campaigner as Al Gore spurns Trump for a failed attempt to derail the energy revolution.

Speaking in London last night, Gore said: "I was worried when the president of my country announced he was making an announcement about [climate change](#), that if he hauled the U.S. out of the [Paris agreement](#) other nations would use it as an excuse to follow.

"There has been no such cascade. Indeed, no-one else has left. What we have seen is increasing support for the agreement from across the world, and within the US expressions of solidarity from American governors, mayors and business.

"No matter what President Donald Trump says, no-one can stop the energy revolution now."

Improving Lives

Gore was speaking at the Royal Geographical Society in London at a ceremony to present the 2017 Ashden Awards. [Ashden](#) gives financial prizes and practical assistance to [organizations](#)

[across the world which promote renewable energy](#), providing cleaner air and sustainable transport. So far 200 groups, improving the lives of 80 million people, have been honored.

Gore, who first came to the Ashden Awards 10 years ago, served as U.S. vice-president for eight years from 1993, and represented the U.S. in Japan when [the Kyoto Protocol](#) was signed in 1997. He was also present at the conclusion of the Paris agreement in 2015.

He now campaigns on climate issues and, with the Intergovernmental Panel on Climate Change, was awarded the 2007 Nobel Peace Prize.

Gore told the Ashden winners that the sustainability revolution, as he called it, was one of the great moral causes of human history. It was like many of the movements of the past—the abolition of slavery, winning women's suffrage, ending apartheid in South Africa and gaining civil rights in America. People said it could not be done, it met all kinds of fierce resistance, but in the end these causes triumphed.

"It boils down in the end to what is right and what is wrong. It is clearly wrong to destroy the Earth for future generations. It is wrong to use the sky as an open sewer. It is right to give future generations hope and to give them a clean and sustainable future."

In a direct repudiation of President Trump's own view of climate change, Gore said the overwhelming scientific evidence was that global warming was already here and a dangerous threat to the Earth.

"The greatest advocate of all, Mother Nature, is telling us what a mess we are creating", Gore said. He spoke of how the Earth's water cycle was being disrupted, sea levels were rising and diseases spreading.

Bypassing Fossil Fuels

But he believed it was possible to change and to save the situation. Human civilization had begun with the agricultural revolution, then in the 19th century the industrial revolution, followed in our lifetimes by the digital revolution. Now it was the sustainability revolution that was under way.

It was happening across the world in rich and poor countries alike. Solar power was bringing electricity to parts of the world that had never seen electric light. People in parts of Africa and Asia were bypassing the fossil fuel age altogether.

For a long time, Gore said, it had seemed that change was too difficult to achieve and could not be completed in time to avoid catastrophe. But then things had begun to "move much faster than you thought they ever could."

He described the strides being made in China and India on [renewable energy](#), particularly on adopting solar power and producing electric cars. "Already we are seeing carbon dioxide emissions stabilize. There is a hint they are beginning to decline. Maybe we have just reached the tipping point," he said.

Reposted with permission from our media associate [Climate News Network](#).

POTUS Pushing for More Apprenticeship Programs, Grants in 2017

POTUS Donald Trump is pushing for more apprenticeship programs and grants, hoping to attract and prepare students for "great careers that do not require a four-year degree or the massive debt that often comes with those four-year degrees and even two-year degrees."

Catological Scholarship for the Promotion of Animal Welfare

Scholarship Application Deadline: August 1, 2017 **Maximum Scholarship Award:** \$1,000

Deadline August 1, 2017

Any undergraduate or graduate student currently enrolled in school in the United States of America is eligible to apply for the Catological Scholarship For The Promotion Of Animal Welfare.

We recognize that animal lovers come in many forms. Therefore, the scholarship is open to students in every field of study. There are no age, major, or other restrictions, so long as you are, or will be by the time of awarding, enrolled in a U.S. post-secondary institution.

Eligibility:

- -Must be a U.S. citizen or permanent U.S. resident
- -Currently enrolled in an undergraduate or graduate program in the U.S.
- Optional Award: Have your writing featured on our website! This is completely optional, but we would be happy to publish a piece of original content on animal welfare, or even feature you as a regular contributor.

- Winners will be announced in September.
- Applicants must submit an essay on the following question: What daily, monthly, and yearly habits should people adopt to affect positive change for animal welfare?

For more information or to apply, please visit the scholarship provider's website.

AQHF Racing Scholarship Award Amount: \$8,000 Deadline: December 1, 2017

Many fields of employment are tied either directly or indirectly to the horse industry. Career path scholarships allow students to obtain a degree in areas such as racing, animal science, journalism, communications, therapeutic/adaptive riding and veterinary medicine. Support for students within these fields is imperative to the sustainability and advancement of our industry. Undergraduate, graduate or doctoral level degrees can be completed by students through these scholarship opportunities. Application materials must be postmarked. Applications sent by fax or email will not be accepted.

The AHQF Racing Scholarship is for students who have experience within the racing industry or are seeking a career in the industry. Applicants may specialize in veterinary medicine, racetrack management, or other related fields. Applicants can apply during their senior year of high school or while enrolled at an accredited college, university, or vocational school, and must maintain a minimum 2.5 GPA. Funding for this scholarship can be applied towards a two or four-year degree program.

Certified Angus Beef Colvin Scholarship Fund Amount:\$6,000 Deadline 12.12.17

This year, \$20,000 will be split among five undergraduate scholarships in the amounts of \$6,000, \$5,000, \$4,000, \$3,000 and \$2,000. College juniors and seniors who have shown commitment to the beef industry, either through coursework or activities, are encouraged to apply. A \$6,000 graduate level scholarship will be awarded to a deserving, full-time masters or doctorate student conducting research related to high-quality beef production. Applications for that award are due January 16.

Eligibility:

- -Demonstrated commitment to the beef industry through pursuit of a meat science, food science, animal science, marketing, business, communications, journalism, or other degree related to the beef industry through activities and curriculum.
- -Available only to students who have enough credit hours to be classified as a junior or senior at the beginning of the upcoming spring semester or quarter at a four-year institution. Past, present and current interns of Certified Angus Beef LLC are eligible
- -Certified Angus Beef LLC employees' immediate family members are not eligible to apply
- Applicants must also submit a double-spaced, typed essay of no more than 1,000 words on the following topic:
- "Cattle harvesting weights continue to increase. What industry influence can the Certified Angus Beef brand have to maintain beef as a competitive protein while delivering the weight range of product desired by both retail and food service operations?" Additionally, a double-spaced, typed essay of no more than 500 words on the following topic: "Why are you pursuing the career path you have selected?"

Chuan Ai Lu Engstrom Memorial Scholarship Award \$1,000 DeadlineVaries

August 1 for fall semester and December 1 for the spring semester

PCB Solutions, a provider of high-quality printed circuit board manufacturing, and created the scholarship in tribute to former employee Chuan Ai Lu Engstrom who passed away in 2014 from uterine cancer. Ai emigrated from China after marrying PCB Solutions' president Greg Engstrom and became an American citizen. Ai loved learning English and was proud to be an American. This scholarship is in honor of her loving, kind and patient legacy. She was an optimistic, loving human being. Even in the worst of times and through her pain and suffering, she was always optimistic. She smiled her way through life and will be greatly missed. She is survived and always loved by family, friends and her husband, Greg Engstrom.

- -Write an essay of no fewer than 800 words on the topic: How you envision the global economy in the future
- -Competitive candidates will describe any experiences with a global economy and how you would approach international business if you had the influence
- -If applicable, describe any experience in manufacturing, logistics or business that would support your vision
- -Provide entrepreneurial ideas about international business, starting and running your own business, and how your management style would be instrumental in your success
- -The topic is broad and can include: healthcare, business, science, engineering, etc.
- -Include a short bio video describing yourself, your history, why education is important to you and how you will use your scholarship money
- -Publish your essay anywhere on the Internet, i.e. your personal blog, YouTube or any other online publishing platform, or email as a Word document or PDF
- -YouTube submissions are encouraged, but not required. The video should be no longer than 4 minutes. (Essays submitted via YouTube must also be submitted in writing.)
- -Email a Content Contribution Agreement, along with your full contact information, major, graduation date, and the link to access your essay
