Columbus Day

Hear the real facts about the slave trading war criminal and his genocide of the Native Americans (NOT Indians) youtube.com

- [Five scary Christopher Columbus quotes that let you celebrate the holiday the right way](#)
[Happy Columbus Day! I hope you're celebrating the holiday appropriately, by](#)

breaking into someone's home and claiming that you discovered and now own it! Or you could just, you know, mourn the genocide of indigenous people by shopping. Because we all grieve in different ways.

The Raw Story

- Christopher Columbus was awful (but this other guy was not) - The Oatmeal
All of the information in this essay came from A People's History of the United States, by Howard Zinn, and Lies My Teacher Told Me, by James W. Loewen, both of which uses primary sources such as eyewitness accounts, journal entries, and letters from Christopher Columbus himself.

The Oatmeal

- Columbus Day? True Legacy: Cruelty and Slavery
Why do we honor a man who, if he were alive today, would almost certainly be sitting on Death Row awaiting execution?

The Trump administration is secretly taking the dangerous first steps toward opening our pristine Arctic National Wildlife Refuge in Alaska to risky oil drilling.

This is the worst assault on the Arctic Refuge in decades — and it's for no other reason than to bolster fossil fuel industry profits. We need your help to stop it at all costs.

Here's the thing: The administration can't open the refuge to drilling without the go-ahead from Congress.

Please urge your senators and representative to do everything in their power to stop Trump's despicable drilling plans!

Often called "America's Serengeti", the Arctic Refuge's 1.5 million-acre coastal plain is its biological heart: Our nation's largest denning site for pregnant polar bears ... the last home of 350 shaggy muskoxen ... the birthing ground for the 197,000-member Porcupine caribou herd ... and vital to the culture and survival of the region's Gwich'in people.

The Trump administration's short-sighted drilling scheme throws all of that into jeopardy. Its proposal would open the door to drilling by allowing massive seismic testing — which has been outlawed for 35 years because of the obvious threats that it poses to imperiled wildlife and their habitat.

But still, President Trump and anti-wildlife members of Congress want to ram this short-sighted plan through as quickly as possible — **so they're hard at work pushing pro-drilling legislation and using a backdoor budget process to allow drilling on the refuge's coastal plain.**

Trump and his allies in Congress are already proposing massive funding cuts to the EPA and other critical agencies that protect our environment, our climate, and our health. We can't let them add the Arctic Refuge to the chopping block.

But, pro-environment legislators are also considering important new bills that would STOP this deadly drilling — by designating the refuge's sensitive coastal plain as protected wilderness.

Our lawmakers need to know that the American people are watching. **We need to show them that they'll face massive, nationwide opposition if they go along with Trump's plan to destroy the Arctic Refuge.**

[Urge your senators and representative to support any legislation that will protect the Arctic Refuge, and vote against any bills or riders that would allow the administration to drill or permit seismic testing in this spectacular wild place.](#)

Thank you for standing with us. Sincerely, Rhea Suh, President, NRDC Action Fund

Wrong continent, but this little guy is concerned too! sdc

[Federal government: No threatened species listing for walrus](#)

ANCHORAGE, Alaska (AP) - The Trump administration announced Wednesday it will not list the Pacific walrus as a threatened species based on diminished Arctic Ocean sea ice, concluding that the marine mammals have adapted to the loss. U.S. Fish and Wildlife Service officials said they cannot determine with certainty that walruses are likely to become endangered "in the foreseeable future," which the agency defines as the year 2060. The decision could be challenged in court b...

Sonic Sea is a first on a number of fronts. Our film is the first to so comprehensively document the horrible damage that industrial ocean noise from sonar, commercial shipping, seismic testing, and oil and gas drilling is doing to whales and other marine life — a problem not well known to the public. And we knew we had to find a way to depict the natural sounds — sounds most humans never hear — that these majestic creatures depend on for their survival.

So we created a series of animations and graphics that visually represent the ocean's sonic landscape — developing sequences at once beautiful and also grounded in scientific fact. And they are matched by a rich and immersive sound design.

***Sonic Sea* — which NRDC supporters like you can [stream for free using promo code SONICSEE](#) — has already helped:**

- Spur the release of NOAA's long-delayed ocean noise strategy
- Convince the Canadian government to commit to reduce shipping noise in key habitats
- Inspire General Electric to help develop an industry consortium to reduce shipping noise
- Strengthen the fight against seismic blasting off the mid-Atlantic and southeast coasts

[I hope you can take some time to watch this film that is so near and dear to my heart.](#)

Then cross your fingers with us on October 5 as the News and Documentary Emmy awards are announced.

Thank you for everything you do to help NRDC lead the fight — in and out of court, on and off the screen — for our environment.

Sincerely, Daniel Hinerfeld, Filmmaker, *Sonic Sea*, Director, Content Partnerships, NRDC
P.S. If you're interested in gifting the film and its study guide to your alma mater or your children's school, contact Allie at allie@rocofilms.com.
