Library That Isn't

By JENNIFER SCHUESSLER

The Obama Presidential Center in Chicago won't include a research library and archive. To some historians, that's a problem.

Announcing CFWN 2019 Scholarship Opportunities

Did you know **Community Foundation of Western Nevada** offers scholarships for university, community college, certificate, graduate school, or even preschool? You will find the Community Foundation of Western Nevada application process a bit easier this year as our scholarship process has changed!

All applicants will complete an Eligibility Quiz as a starting point. After completing all questions on the Quiz students will have access to multiple scholarships that match their qualifications. Students need to apply for each scholarship individually.

[Scholarship Eligibility Quiz](#)

Scholarships are available for students graduating high school, those in college or trade school, and medical school students, even 2 ½ - 5-year-olds have the opportunity to qualify for a year of preschool tuition. All Community Foundation scholarships are listed on our [website](#) with links to individual scholarship descriptions, criteria, and information.

Applying to renew a Community Foundation scholarship?

You still need to complete the Eligibility Quiz. Upon completion, you will be taken to the appropriate renewal application. **All renewal applications are due February 28, 2019.**

Work = Force x Distance. Force = Mass x Acceleration. Therefore Work = MAD(ness). We enjoy four day work weeks. In fact, we often say those weeks are 20% shorter but 100% better. Apparently, there is science behind this too: [“Four-day week: trial finds lower stress and increased productivity: Study of pilot at New Zealand firm finds staff were happier and 20% more productive”](#) (Guardian) We think about work a lot, and perhaps too much. In fact, work not just consumes our working hours but also our leisure hours. [“Office Space at 20: how the comedy spoke to an anxious workplace: In the cult 1999 film about corporate malaise, the story of an everyman rallying against his sedate life found itself a loyal following”](#) (Guardian) [“8 companies offering work-from-home jobs that don’t require a college degree.”](#) (CNBC) [“This Is the Fastest-Growing Six-Figure Job in America — and it Doesn’t Require a Degree.”](#) (Money)

[Cal Poly researcher looks back at California’s mega-drought](#)

[By Richard Gearhart, KSBY, 2/18/19](#)

Drought has long been a part of California’s history. There is archeologic evidence that shows periods of below-normal rainfall have lasted for more than 50 years in the past. A Cal Poly professor is looking back at those so-called mega-droughts to see what we might be able to learn about the area’s climate in the future. Archaeology professor Terry Jones has been looking into California’s climate for most of his career. He found evidence of a 50-plus year mega-drought in our area 800 years ago that forced a change in the culture of native Central Coast residents. They responded to the incredibly dry conditions by turning away from land and to the ocean for food.

Gov. Sisolak Encourages Young Women to Learn Cybersecurity

Governor Steve Sisolak has announced a partnership with the SANS Institute to launch Girls Go Cyberstart and Cyber FastTrack in Nevada. The SANS Institute was established in 1989 as a cooperative research and education organization. Its programs reach more than 165,000 security professionals around the world.

The initiative gives young women in high school and college an opportunity to learn cybersecurity skills, discover their cyber talents, and explore a career in the field. The three Nevada high schools with the most participants will win awards of \$1,000, \$750 and \$500, respectively. At least 10 high school girls will each get \$500 scholarships to help them pay for college.

“I am committed to ensuring that all young women across Nevada have access to the education and experiences that will prepare them for exciting careers in STEM fields,” said Governor Sisolak. You can read more [here](#).

\$121,875: Fine levied against Formosa, a plastics manufacturer, by Texas regulators for dumping plastic pellets into Lavaca Bay, on the Texas Gulf coast. Formosa wants a federal judge to dismiss a **Clean Water Act lawsuit** brought by citizens against the company in response to the pellet dumping. [Victoria Advocate](#)

Does the Clean Water Act apply to pollutants discharged to groundwater that then flows into rivers and lakes? That is the question that the U.S. Supreme Court will decide in a case that has nationwide consequences for pollution regulation. Lower courts have issued contradictory rulings, largely in cases involving pits that hold coal waste. [USA Today](#)

Clean Water Act case could have sweeping impacts By Ellen M. Gilmer, E&E News, 2/19

The Supreme Court is taking up another far-reaching debate over the scope of the Clean Water Act. The justices this morning agreed to hear *County of Maui, Hawaii v. Hawai'i Wildlife Fund*, a case involving whether the law covers pollution that moves through groundwater before reaching a federal waterway.

There's enough concrete in the Hoover Dam to build a two-lane highway from San Francisco to New York City.

Groundwater Contamination Devastates a New Mexico Dairy - and Threatens Public Health

Amy Linn, Searchlight New Mexico

Linn writes: "For months, Clovis dairy farmer Art Schaap has been watching his life go down the drain. Instead of selling milk, he is dumping 15,000 gallons a day - enough to provide a carton at lunch to 240,000 children. Instead of working 24/7 to keep his animals healthy, he's planning to exterminate all 4,000 of his cows, one of the best herds in Curry County's booming dairy industry." [READ MORE](#)

The FY 2018 ICDBG NOFA was reissued. Please see below for additional information:

Funding Opportunity Number: FR-6200-N-23

Funding Opportunity Title: Community Development Block Grant Program for Indian Tribes and Alaska Native Villages

CFDA Number: 14.862

CFDA Title: Indian Community Development Block Grant Program

Opening Date: Feb 19, 2019

Closing Date: Mar 20, 2019

HUD is reissuing the NOFA for the Indian Community Development Block Grant program (FR-6200-N-23) to receive additional applications for approximately 30 calendar days. Eligible applicants that did not submit an application under the original announcement that closed on January 7, 2019 will have the opportunity to submit applications during this time. Applicants that did submit an application under the original announcement may submit another application, though resubmission is not required. HUD will only evaluate the last submission received by Grants.gov before the deadline, regardless of whether the application was submitted is under the original announcement or this reissued NOFA. The language and requirements remain the same as the original announcement with the exception of project start and end dates (see Section II.D of this NOFA).
