Opportunity lost: Nevada's school trust lands sold off over 150 years

By [Amelia Pak-Harvey](#) / RJ

Through a series of trades, efforts to lure settlers and some shady dealings, much of the 4 million acres originally given to the state to benefit public education is now gone.

[Wyoming mail carrier encountered vast herd of migrating antelope during recent delivery.](#)

Library Resource Spotlight: LibKey Nomad

A Chrome extension tool that facilitates access to articles available through the University Libraries.

Did you know that there's now an easier way to access the Library's online articles through a Chrome browser extension? [LibKey Nomad](#) allows library users to access articles available through the library's subscriptions by linking to our link resolver ("Find It" button). It provides single-click access to library content from publisher websites such as PubMed, Wikipedia, and more. This tool will show you when the library has a subscription and, if not, will point you to access the article in other ways. Since it is a browser tool, you will know if an article is available for access before you have to log in with your NetID.

How does it work?

LibKey Nomad uses identifiers, not [OpenURL](#) or domain-based, for precise linking to the library's full-text. This tool consults the University Libraries' holdings data to know if and where an article is available, including from within extensive collections like EBSCO and ProQuest. If no holdings are found, LibKey consults a combination of the LibKey Open Access Knowledge Base and [Unpaywall](#) to provide open access discovery.

Library users will be given the best available version of an article; if there is no published version available, LibKey Nomad will notify you if it finds an approved open access Manuscript PDF or link. If no open access versions are identified, LibKey will connect you to the Libraries' interlibrary loan service so you can request a copy of your article from another library. It is freely available for University library users and no personal account sign-up is needed!

How can I install it?

Presently, LibKey Nomad is only available for Chrome and can be downloaded through the [Chrome Web Store](#). For more instructions on setting up LibKey Nomad for your Chrome browser, check out the [Discovery Services Tips Blog post](#).

About University Libraries

The University Libraries embrace intellectual inquiry and innovation, nurture the production of new knowledge, and foster excellence in learning, teaching, and research. During each academic year, the Libraries welcomes more than 1.2 million visitors across its network of three branch libraries: the Mathewson-IGT Knowledge Center, the DeLaMare Science and Engineering Library and the Savitt Medical Library. Visitors checked-out more than 90,000 items and completed more than 2 million database searches. **December 12, 2019 Jazmin Arevalo**

For 87 years, World Learning Inc. has been working to create a more peaceful and just world.

It all began with our founding as The Experiment in International Living, which sent young people abroad to learn how to live together by living together. Today, our three branches—The Experiment, School for International Training (SIT), and World Learning—are connected by four core values: Community, Intercultural Understanding, Social Inclusion and Justice, and

Sustainability. Our values unite us, guide our actions, and are reflected in the ways we work and fulfill our mission.

In this [World Learning Inc. 2019 Impact Report](#), you'll learn how these values are woven into the fabric of all our programs while also discovering the inspiring outcomes of your giving and support. We hope you'll enjoy the stories and updates about our programs.

Young indigenous activists are leading on climate justice in Alaska

Two Alaska Native teenagers pushed for a resolution declaring a climate emergency — and decision-makers listened.

We asked, you answered: Here's how the climate changed your lives in 2019

Wildfires in California, flooding in India, and seasonal swings

everywhere.
