## **Lance West**

*It's heartbreaking to read the final environment impact statement prepared by the Navy for the Fallon Range Training Complex Modernization. Here's the link to . . . [See More](#)*

## **Elveda Martinez**

*This is going to impact our traditional lands, pinenut picking areas, hunting lands and wilderness areas forever. The Navy is making it sound like we'll be able to enter these lands when they're not training. That might be 50 days out of the year, but once it becomes contaminated with live ordnance no one will be allowed. This is 660,000 acres of land that will be fenced off.  
(click to enlarge)*

Summary		Cultural Resources						
<p>Fallon Range Training Complex Modernization Final Environmental Impact Statement</p>		January 2020						
<p>Table 3.11-8: Summary of Impacts and Conclusions for Cultural Resources</p>								
<p><b>Summary</b></p>		<p><b>Summary of Impacts and National Environmental Policy Act Determinations</b></p> <table border="1"><thead><tr><th>No Action Alternative</th><th>Impact Conclusion</th></tr></thead><tbody><tr><td>Summary</td><td><ul style="list-style-type: none"><li>Decommissioning, decontamination, and reuse of the closed range could potentially affect cultural resources present in the FRTC.</li><li>A decision to allow the FRTC land withdrawal to expire would have no direct effects on cultural resources because federal management of the area would continue.</li></ul></td></tr><tr><td>Impact Conclusion</td><td>The No Action Alternative would not result in significant impacts on cultural resources.</td></tr></tbody></table>	No Action Alternative	Impact Conclusion	Summary	<ul style="list-style-type: none"><li>Decommissioning, decontamination, and reuse of the closed range could potentially affect cultural resources present in the FRTC.</li><li>A decision to allow the FRTC land withdrawal to expire would have no direct effects on cultural resources because federal management of the area would continue.</li></ul>	Impact Conclusion	The No Action Alternative would not result in significant impacts on cultural resources.
No Action Alternative	Impact Conclusion							
Summary	<ul style="list-style-type: none"><li>Decommissioning, decontamination, and reuse of the closed range could potentially affect cultural resources present in the FRTC.</li><li>A decision to allow the FRTC land withdrawal to expire would have no direct effects on cultural resources because federal management of the area would continue.</li></ul>							
Impact Conclusion	The No Action Alternative would not result in significant impacts on cultural resources.							
<p><b>Alternative 1</b></p>								
<p><b>Summary</b></p>		<ul style="list-style-type: none"><li>The Navy would implement protective measures and negotiated mitigations for ground-disturbing activities and munitions noise for NIHRP-eligible cultural resources and potential HCP/sacred sites within the ranges in accordance with an amended PA and the ICMP.</li><li>Access for ceremonial, cultural, and academic activities and procedures for site visits would be allowed, dependent on the Navy's training and safety requirements; however, due to potential loss of access documented in comments received from Indian tribes, the Navy concludes limiting tribal access to cultural resources may result in significant impacts.</li><li>Noise and vibration associated with sonic booms have the potential to result in negligible-to-minor damage to caves, rockshelters, or rock formations containing petroglyphs as well as adobe walls and stone structures. Procedures are in place for identifying, evaluating, and protecting such resources as defined by an amended PA and the ICMP.</li></ul>						
<p><b>Impact Conclusion</b></p>		<p>Under Alternative 1, the Navy anticipates that, with avoidance of known cultural resources and implementation of the other mitigation measures discussed in the chapter above, impacts to cultural resources would be lessened to less than significant levels. Access to cultural resources within the FRTC would be managed and not eliminated. Given the proposed access MOU has not been finalized and the high degree of concern with respect to potential loss of access documented in comments received from Indian tribes, the Navy concludes limiting tribal access to cultural resources may result in significant impacts.</p>

**Author explores heavy emotion behind the removal of Native independence**

Two years ago, Louise Erdrich succumbed to a nasty bug and took to her bed for a time. She slept, she daydreamed and she finally rose with a conviction that her next novel could be found in letters that her grandfather, Patrick Gourneau, had written in a particularly tumultuous period of his life.

"The Night Watchman" is a fictional story constructed around the real-life 1950s history of the attempt of the U.S. government to "terminate" the rights of Native Americans to their lands, assets and their sovereignty.

Erdrich's grandfather was the chairman of the Turtle Mountain Band of Chippewa Advisory Committee, even as he held down a job as a night watchman at a local manufacturing plant. Unpersuaded that this was the "emancipation" for Indians that members of Congress claimed it was, he quickly saw the federal resolution for what it was: a move to strip Native people of their remaining independence.

In the novel, we sit with Thomas Wazhushk through his solitary hours as he guards the plant and strategizes about how to fend off the termination. We meet his daughter Patrice, or "Pixie," as she embarks on a dangerous quest to find her sister. And we travel with the next generation — Wood Mountain, a young boxer, Patrice's dear friend, Valentine, and the book-smart Millie, who is brought into the tight circle of the family.

More than 100 tribes lost land to the termination policy, although 78 would regain it. Erdrich confides in the novel's afterword, "Much of this book was written in a state of heavy emotion, as I remembered the grief my grandmother and mother's siblings suffered as the continued political fights took their toll and my grandfather's health began to suffer."

**It's the birthday** (March 2) of the children's book author who wrote under the name [Dr. Seuss](#) ([books by this author](#)), born Theodor Geisel, in Springfield, Massachusetts (1904). He published his first book for children, *And to Think That I Saw It on Mulberry Street*, in 1937.

In 1955, an educational specialist asked him if he would write a book to help children learn how to read. Seuss was given a list of 300 words that most first-graders know, and he had to write the book using only those words. Seuss wasn't sure he could do it, but as he looked over the list, two words jumped out at him: "cat" and "hat."

Seuss spent the next nine months writing what would become *The Cat in the Hat* (1957). That book is 1,702 words long, but it uses only 220 different words. A few years later, Seuss's publisher bet him \$50 that he could not write a book using only 50 different words. Seuss won the bet with his book *Green Eggs and Ham* (1960), which uses exactly 50 different words, and only one of those words has more than one syllable: the word "anywhere."

## **Taboo Brings Marvel Characters To Indian Country With New Comic**

Red Wolf, a Marvel comic that has been around since its debut in 1970 and was published in Avengers #80, is getting revamped by writers Ben Jackendoff and Taboo Nawasha—from the Black Eyed Peas—and will be titled Werewolf by Night.

The original Red Wolf was the first Marvel comic to feature a Native American superhero and Werewolf by Night will continue the story through a Native lens, which is very important to its

authors.

## GrantStation

### National Opportunities

#### [Support for Climate Solutions Focused on Natural and Working Lands](#)

The Natural Climate Solutions Accelerator grant program, administered by The Nature Conservancy, supports project with potential to substantially increase the use of natural climate solutions throughout the United States.

#### [Digitization of Rare and Unique Collections Funded](#)

Digitizing Hidden Special Collections and Archives, a program of the Council on Library and Information Resources (CLIR), is intended to help digitize and provide access to collections of rare or unique content in cultural heritage institutions.

### **Collaborative Grants Promote Youth Volunteerism**

Youth Service America (YSA) believes that youth, communities, and our democracy thrive when we all work together for the common good.

### **Community Improvement Projects Supported**

The AARP Community Challenge grant program is supporting quick-action projects that can help communities become more livable for people of all ages.

#### **Regional Opportunities**

### **Funds for Innovative Programs in MN, ND, and SD**

The Bush Prize for Community Innovation honors nonprofit organizations and government entities with a track record of making great ideas happen in the regions the Bush Foundation serves: Minnesota, North Dakota, South Dakota, and the 23 Native nations that share the same geography.

### **Grants Enhance Employment Solutions for New Jersey Citizens With Disabilities**

The Kessler Foundation is dedicated to improving the lives of people with disabilities caused by stroke, multiple sclerosis, injuries to the brain and spinal cord, and other chronic conditions.

### **Support for Youth and Environmental Initiatives in Hawaii and Oregon**

The Healy Foundation is dedicated to building community and supporting the environment and youth in the states of Hawaii and Oregon.

### **Funds for Organizations in Company Communities in IL, IA, KS, MI, MN, and OK**

The ITC Charitable Giving Program supports nonprofit organizations in counties served by the company in Illinois, Iowa, Kansas, Michigan, Minnesota, and Oklahoma.

#### **Federal Opportunities**

### **Community Forest Efforts Supported**

The National Forest Resiliency Innovation Challenge Cost Share Grant Program seeks to establish sustainable urban and community forests by encouraging communities of all sizes to manage and protect their natural resources.

### **Funds Available for Native American Libraries**

The Native American Library Services: Basic Grants program provides funding to support existing library operations and maintain core library services.

---

### **EPA Administrator Andrew Wheeler Calls for Applications to Develop and Implement National Environmental Education Training Program**

### **Multi-Year Cooperative Agreement will be Awarded up to \$11 Million**

As directed by the National Environmental Education Act of 1990, the U.S. Environmental Protection Agency (EPA) is pleased to announce the availability of approximately \$11 million in funding for a multi-year cooperative agreement to develop and manage the National Environmental Education Training Program. Applications must be submitted no later than May 29, 2020.

"Training environmental educators on the latest science, technology, and engineering is crucial not only to their engagement on the issues, but also to inspiring the next generation of environmental educators," said EPA Administrator Andrew Wheeler. "Through this cooperative agreement, we hope to increase the availability and understanding of scientific information to improve environmental decision making and promote a cleaner, healthier environment for all Americans."

The purpose of the program is to develop and deliver environmental education training and long-term support to education professionals across the U.S. Applications must include proposals for national programs that will:

- Help train environmental educators.
- Increase distribution of quality materials.
- Improve non-formal education programs.
- Enhance coordination among environmental education organizations to help reduce duplication and costs.
- Increase the number of environmental educators.
- Increase public knowledge of the environment.

Only one cooperative agreement will be awarded to a U.S. institution of higher education, a not-for-profit institution, or a consortium of such institutions. Applicants must provide non-federal matching funds or in-kind contributions of at least 25% of the total cost of the project.

### **Background**

In 1991, EPA established the Office of Environmental Education to implement programs mandated by the National Environmental Education Act, including the National Environmental Education and Training Program. Since 1992, the program has trained more than 4,400 formal and nonformal educators by building infrastructure through leadership clinics, developing state certification programs, and using technology to expand access to resources to enhance the value of environmental education, among other initiatives.

Information on how to apply for the National Environmental Education and Training Program for 2020 is available at: <https://www.epa.gov/education/national-environmental-education-and-training-program-solicitation-notice-2020-rfa>

Information about the teacher training program: <https://www.epa.gov/education/national-environmental-education-training-program>.

Osiyo friends,  
I am reaching out to all our tribal partners to share information on a current series of webinars your community/tribal members might be interested in. The webinar series helps individual Native entrepreneurs explore opportunities that exist to create small businesses related to cultural and geographical tourism in Indian Country. The series is hosted by the IDRS Acorn Project and moderated by Native entrepreneur Stacia Morfin, Nez Perce Tourism LLC

In our next webinar on March 3rd, Stacia and guest speakers Roxanne Best and Russ Seagle from Sequoyah Fund will discuss funding resources available for small businesses including grants, CDFI loans and business plan competitions. Any type of business could benefit from this particular webinar. You can register or learn more about the webinar series by visiting [nativebiz.org/tourism](http://nativebiz.org/tourism). For your convenience, I have attached the following jpeg and pdf flyer. If you would like to share our post about the event to your Facebook page, visit <https://www.facebook.com/idrsacornproject/>.

Lynn Wilson (Cherokee), Micro-Enterprise Dev. Specialist 918-978-7622 [Idrsinc.org](http://Idrsinc.org) | [Nativebiz.org](http://Nativebiz.org)

RIP Billy Eisenhour (no info at “press time”)
