Mike McGuire

On this Native American Day 2021, grateful to @GavinNewsom.

He signed our historic legislation - SB 231 - transferring ownership and management of the sacred Blues Beach property on the Mendocino Coast back to Mendocino County Tribes. Returning this land of cultural significance is not only the right thing to do, but it will also lead to enhanced stewardship, historical preservation and protection of sacred sites.

This has been a tremendous partnership between the Sherwood Valley Band of Pomo Indians, Round Valley Indian Tribes, and Coyote Valley Band of Pomo Indians. This bill wouldn't have been signed without the leadership of the three Tribal Chairpeople: Chairwoman Melanie Rafanan, President James Russ and Chairman Michael Hunter.

We will continue to work with each of the Tribal governments, neighbors of the property and the coastal community on the upcoming management plan.

Look forward to the work ahead!

FCC GRANT OPPORTUNITY

FCC announces second ECF application window; \$5.137 billion requested in first window

The FCC will open a second application filing window for schools and libraries to request funding from the roughly \$2 billion in Emergency Connectivity Fund program funds remaining for connected devices and broadband connections for off-campus use by students, school staff, and library patrons for the current 2021-22 school year.

From September 28 to October 13, eligible schools and libraries can apply for financial support to purchase connected devices like laptops and tablets, Wi-Fi hotspots, modems, routers, and broadband connectivity for off-campus use by students, school staff, and library patrons during the COVID-19 emergency period. During this second application filing window, eligible schools and libraries, in addition to school/library consortia and Tribal libraries eligible for IMLS support, can submit requests for funding to purchase eligible equipment and services between July 1, 2021, and June 30, 2022.

More information about the program is available at <u>emergencyconnectivityfund.org</u>, including information about how to apply. Help with program questions is also available by calling 800-234-9781 from 8:00 a.m. to 8:00 p.m. EST.

How indigenous knowledge is changing the way California tracks the effects of climate change By CapRadio, 9/22/2021

All throughout California, communities have weathered the impacts of a changing climate from rising ocean waters to intense wildfire seasons. In 2009, the state's Office of Environmental Health Hazard Assessment (OEHHA) published its first report on these indicators, which the department describes as "scientifically-based measurements that track trends in various aspects of climate change." That can mean tracking anything from glacier changes to extreme heat events. But reports like these don't often account for tribes' experiences with climate change. L'eaux Stewart of the Big Pine Paiute Tribe said that's, in part, because of the "extremely academic-based" approach of Western science. It often relies heavily on previous documentation to prove a point — which is a large part of the reason why it has disregarded Indigenous knowledge as a source for so long.

Orange Shirt Day September 30th

What can you do?

Read books by Indigenous authors

Review the 94 Truth and Reconciliation calls to action and commit to at least one

Watch online events hosted by the National Centre for Truth and Reconciliation

Identify and connect with your local Indigenous serving organizations

Read Phyllis Webstad's book "The Orange Shirt Story"

Mexico's Ancient Inhabitants Moved Land and Bent Rivers to Build Teotihuacán

The Maya Built This Monumental Pyramid Out of Volcanic Rock

Kenya Installs the First Solar Plant That Transforms Ocean Water Into Drinking Water - Green Living Tribe

Drinking water is taken for granted in many parts of the world, but as time continues to pass it has become obvious that we need new solutions to take the

Where Solar Power Means Tribal Sovereignty

Tribal lands are often the front lines in the fight against fossil fuels, as we've seen from the

protests against the Dakota
Access Pipeline at Standing
Rock and against the Line 3
expansion on the Red Lake
Reservation. But tribal lands
also possess a powerful
alternative energy source. Their
solar power potential is more
than four times the total amount
of energy produced in the U.S.
last year. In this first installment
of our new series on Indigenous

sovereignty in climate solutions,

Abaki Beck examines energy groups working to tackle climate change while creating sustainable, Indigenous-led economies.

Sequoia National Park fire: First photos show park's most famous trees have so far survived By the Mercury News, 9/23/21

Fires have been burning for two weeks in Sequoia National Park and Sequoia National Forest, two of California's iconic landmarks. Late Wednesday, National Park Service officials finally allowed press photographers into the Giant Forest, a spectacular grove that contains five of the largest trees in the world by volume, including the General Sherman Tree, the world's largest, which is 275 feet tall, at least 2,300 years old, and 102 feet around at the base.

Going Beyond Composting

3 composters who are thinking about the soil as well as better food waste systems.

URINE TEST FOR FREE:
Go to a tree trunk and take a piss. If it attracts a lot of ants you have high glucose. If it dry too fast you have high sodium. If it smells like meat, you have high cholesterol. Forgot to open your pants to pee, Alzheimer's. Had trouble aiming at the tree, Parkinson's. If you pee on your feet, prostate.
Couldn't smell the pee, definitely COVID.

Nevada Commission for Women

WHAT IS A NEVADA STATE BOARD OR COMMISSION?

Boards and commissions are created to provide citizens a voice in their government and influence decisions that shape the quality of life for the residents of the Silver State. Members are responsible for advising the Governor, the Legislature and/or state agencies. Serving on a board or commission is a privilege and one of the most effective ways citizens can become active voice in state government. Governor Sisolak is devoted to appointing qualified and responsible candidates who want to make a positive impact for all in the State of Nevada.

WHAT IS THE NEVADA COMMISSION FOR WOMEN'S MISSION?

The Nevada Commission for Women's mission is to advance women toward full equality in all areas.

WHAT ARE THE GOALS FOR THE NEVADA COMMISSION FOR WOMEN?

- Document the role of women and women's contributions in Nevada
- Promote gender equality
- Increase the number of women in leadership positions in our state
- Empower women to achieve their personal and professional goals

DO YOU HAVE A PASSION TO HELP WOMEN IN NEVADA?
