Snowpeople, Nevada Style

BC EchoHawk is with Athena Brown at U.S. Department of Labor.

We're the training and technical assistance contractor, but we've also known each other for years. We all worked at the National Congress of American Indians together and we continue to serve Indian Country. Athena is retiring at the end of the month following a long career in public service. Her colleagues and friends gathered to celebrate the day. And it was her birthday!! There

was cake.

Restoring Watersheds, and Hope, After New Mexico's Record-Breaking Wildfires

Local non-profits and a tribe that recovered from earlier blazes are critical allies for communities threatened by floods after the largest fire in state history.

Read in Inside Climate News: https://apple.news/AWuPWxKIrTjS7 ckt3rsdSw

• U.S. Rep. Don Beyer, a Virginia Democrat who leads Congress' bipartisan fusion energy caucus, said at a March event: "All of the fossil fuel we burn was created by the light from fusion. Every atom heavier than hydrogen in every cell of our bodies and our world was created by fusion. We are made of stardust. To those skeptics who believe fusion energy impossible, there are 100 billion stars in our galaxy, and two trillion galaxies in our observable universe, and every single one of them is powered by fusion energy."

He added: "Fusion is the holy grail of climate change and decarbonized future. Perhaps even more profoundly, fusion has the potential to lift more citizens of the world out of poverty than any idea since fire."

This junior explorer may have just discovered one of the richest lithium deposits in North America. Exploratory drilling is scheduled for Q1 2023.

Plan Way Ahead:

What historic Klamath River dam removal and restoration project aims to accomplish

By The Sacramento Bee, 12/9/22 - A decision to demolish four dams and restore the Klamath River, which crosses the California-Oregon border, was celebrated Thursday by officials from both states, Native American tribes and the federal government.

As Colorado River Flows Drop and Tensions Rise, Water Interests Struggle to Find Solutions That All Can Accept

By Water Education Foundation, 12/9/22 - When the Colorado River Compact was signed 100 years ago, the negotiators for seven Western states bet that the river they were dividing would have ample water to meet everyone's needs – even those not seated around the table.

A century later, it's clear the water they bet on is not there.

<u>How California's Drought Is Changing the Politics of the Nation's Largest, Notoriously Thirsty Farming District</u>

By KQED, 12/9/22 - Late in the afternoon on Nov. 14, a historic email landed in the inboxes of hundreds of California farmers whose land lies within the Westlands Water District, the largest agricultural irrigation agency in the country — and one of the most controversial.

America's Drought-Hit Lakes and Rivers in Sobering Before and After Photos

Newsweek, 12/9/22 -The year 2022 has seen large portions of the U.S. scorched by blazing temperatures and an oppressive mega-drought.

As of November 29, 2022, 48.1 percent of the total U.S. and 57.51 percent of the mainland 48 states are in some degree of drought conditions, U.S. Drought Monitor data shows. In the summer, this was drastically worse, especially across the west and southwestern states: in July 2022, one third of all land in California, Texas, Oregon, Nevada, Utah and New Mexico was classified as experiencing extreme or exceptional drought.

How California was shaped by its longest river

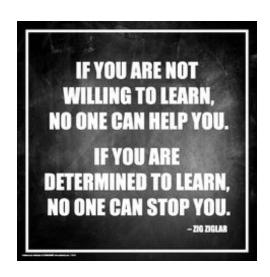

By FOX40 (KXTL), 12/10/22 -

Cities and communities that make up the modern Sacramento Valley, including the city of Sacramento, probably would not exist had it not been for the mighty river that runs down Central California. The Sacramento River has provided the resources necessary for the cities and settlements that are at or near its banks, including the Native American tribes that inhabited the area for thousands of years.

Stephen Ambrose American History Tours EXPLORE NOW AT STEPHENAMBROSETOURS.COM 1.888.903.3329 Crazy Horse & Custer: War on The Great Plains

On our exclusive new tour through Wyoming, South Dakota and Montana, return to those exciting days of yesteryear with author, historian, television and motion picture consultant John P. Langellier, Ph.D., who will share the stories of Crazy Horse and Custer based on a half century of passionate study of these legendary figures. Relive their times and walk the vast lands where buffalo and wild mustangs roamed, the iron horse roared across the tracks, and lonely frontier forts stood as bastions of westward expansion. Outposts such as FortLaramie, battlefields including the ill-fated Fetterman Fightand "Last Stand" at Little Big Horn, along with a world class museum visit at the Buffalo Bill Center of the West, will beamong the highlights of this not-to-be-forgotten adventure.

From the many museums, The Little Bighorn, the Crazy Horse memorial and Mt. Rushmore, to the amazing landscapes, it was a history buff's fantasy come true.

JOHN PRICE

Lewis & Clark: Undaunted CourageHells Canyon, Oregon USA

Relive the dramatic story of Lewis and Clark as you follow in the footsteps of the explorers, Meriwether Lewis and William Clark, and their invaluable guide, Sacajawea. As part of our founder, Stephen Ambrose's research for his best-selling book, Undaunted Courage, the Ambrose family spent vacations traveling the Lewis and Clark Trail on foot, canoe and horseback. There is not a more authentic Lewis and Clark tour than ours. Our historian reads passages from the journals of Lewis and Clark at the very places where camped, including Fort Clatsop, the Expedition's winter camp on the Pacific Ocean. As you travel from Great Falls, Montana through Idaho, Washington and Oregon, ending on the Pacific Coast, you will experience jaw-dropping vistas at every bend of the trail.

LEWIS & CLARK: UNDAUNTED COURAGE TOUR

The Lewis and Clark Expedition was the greatest camping trip of all time, and the greatest hunting trip. And one of the greatest scientific expeditions ever. STEPHEN E. AMBROSE

Apache Wars of the Southwest

Our exclusive new tour is an unforgettable journey through the scenic Southwest that follows in the footsteps of a re-markable cast of historical characters. Author, historian, and television-motion picture consultant John P. Langellier, Ph.D. will tell tales of Cochise, Geronimo, and others based on a half-century of dedicated study of these legendary figures. As you travel from Tucson, Arizona to Sante Fe, New Mexico, haunting deserts and majestic mountains will serve as the dramatic backdrop for stories of conflict and ultimate reconciliation after generations of warriors gave way to peacemakers. You will time-travel to former military garrisons such as El Presidio San Agustín del Tucson, Cochise's nearly impenetrable stronghold, and the vast White Sands that once formed part of the homeland of the people now popularly referred to as the Apache.

Chiricahua National Monument

APACHE WARS OF THE SOUTHWEST TOUR

When I was young I walked all over this country, east and west, and saw no other people than the Apaches.

After many summers I walked again and found another race of people had come to take it. How is it?"

Rezonomics 101: Star Village Coffee's goals are to serve great coffee and support tribal communities

By Owen Bryant

December 13, 2022

Owner Joel Zuniga runs Star Village based the idea of "rezonomics," a unique model of economic principles and business philosophies that support tribal communities.

Since 2020, gun violence has been the leading cause of death for American children. The N.Y. Times Magazine dedicated an issue to 12 American kids who were killed by guns in 2022. One of them was Tioni Theus, of Los Angeles, a girl whose "enthusiasm, her willingness to be effusive or goofy, was infectious." N.Y. Times Magazine

"Standing in Belo Sun's way is Amazon Watch, an Oakland-based nonprofit with an established track record of pushing international miners out of Indigenous territory by deploying a range of tactics."

In the lead-up to COP15, the global Convention on Biodiversity held in Montreal, Canada this year, we launched *The Risks of Investing in Belo Sun*. The report exposes the Canadian company's plan to build a **massive open-pit gold mine in the Brazilian Amazon**, one of the areas with the greatest biodiversity on Earth. The project could have **devastating effects on surrounding communities and climate stability**, not just in the Amazon region, but for the entire planet.

Amazon Watch attended as part of a **powerful team of Indigenous leaders and allies**, and together we were enormously successful at communicating the risks of Belo Sun and other **destructive projects and greenwashing schemes**.

In fact, **Belo Sun's share price has plummeted** following protests and advocacy from activists and Indigenous leaders at the summit. The company's stock has **fallen over 50% just since the report's release**, and it's currently **selling off at under \$0.06 per share**.

Belo Sun insists that it has consulted with affected communities, but those who live in the region know better, and they told the world at COP15. "We didn't realize they were here carrying out studies," shared Bel Juruna. "Belo Sun would be a total extermination for my people, and we wouldn't have a future." She says that she would have shared this with Belo Sun, if it had bothered to ask.

Rare Nevada wildflower added to endangered species list

Tiehm's buckwheat, a rare wildflower only found in a portion of Esmeralda County, was designated as an endangered species by the U.S. Fish and Wildlife Service on Wednesday.

The Disappearing Language of Sparrows

San Francisco white-crowned sparrows have their own dialects. As the city gets louder, those dialects are disappearing.

(Rick Ray)

ed

Here's a banana slug taking its time to cross a leaf.

The banana slug, which emerges in force in Northern California's redwood forests during the rainy season, is one of the weirdest animals on the planet. They breathe through a hole in the side of their head. They also have penises on their heads that are eaten by their mates after copulation. And according to a patient biologist who checked, they are the slowest creatures on earth. More banana slug facts. Bay Nature I Treehugger

"Western USA, circa 1960." (Ernst Haas)

Ernst Haas, an early pioneer of color photography, was known for photographing with the eye of a painter. In 1951, he moved from Austria to the U.S. where his first photo essay on New York so impressed the editors of LIFE magazine that they published them in an unprecedented 24-page spread. A newly published collection focuses on Haas' fascination with the mythology of the American West. The Eye of Photography I Flashbak

More Ernst Haas.
